

2019 Awakening

By Anna Von Reitz

Another earthquake aftershock sent me bolting from my bed bright and early this New Year's Day. This, after a 5.0 tremble last evening, that we received from another quake --and a separate fault system--- centered about 350 miles away in the Alaska Range. Looks like their stunt on November 30 has set off a whole domino-effect and gotten the whole Alaska fault system activated from the Aleutian Chain to the Permian Shield in far northern Alaska.

So be it.

Maybe it's a good object lesson to all of us to batten down the hatches and secure everything.

The situation in America and throughout the world is far from pretty at the moment. We have the looming prospect of open warfare between the Municipal Governments of the world and the Territorial Governments of the world ---- and the actual National Governments have yet to organize and take charge of this situation.

I think it is important for everyone to know that it's not "just" America in the throes of awakening. By far the majority of countries in the world are in the same or worse position than we are, and have been victimized in the same way.

We were merely the first in a long line of other countries that includes England, Scotland, Wales, Ireland, Australia, Canada, Germany and the rest of the European Union, Africa, the Middle East, Mexico and almost all of South America, Africa, India, and most of Asia.

As we awaken, we realize that we have been "occupied" by our own Army for 150 years. They have plundered and pillaged us and worked as mercenaries for European Powers while taking their paychecks from our pockets and filling their ranks with our sons and daughters.

We have been in the thrall of a ruthless mercenary government for fifteen decades and nobody bothered to tell us what was going on.

I have told you before and I tell you again that you have been lied to and that you must use your own faculties to research and discern the truth.

The branches of the Federal Government are not "legislative, judicial and executive".

The branches of the Federal Government are: Federal, Territorial, and Municipal.

Anyone who talks about "legislative, judicial, and executive" is talking about the administration of a corporation, not the lawful government of our country.

They are not being honest about the overall situation, which is that we are being occupied by our own army pending "reconstruction" of the Federal States of States.

The "missing" Federal States of States are only an excuse which these blighters have used to justify (lamely) their continued occupation of our country and their endless "emergency" declarations ---- as if that ever justified their actions or granted them powers not allocated to them under the actual Constitution.

Here is the further fact----we are not obligated to create new Federal States of States.

We are enabled to exercise our formerly delegated powers directly via our own States, so their entire argument is bogus and the "missing" Federal States of States are of no account. Our "failure" to reorganize them after the Civil War is no excuse for what has gone on here, then or now.

All that just served as an excuse for the "U.S. Army" to take over and run things, which they have done behind the scenes for six generations.

We have had the tail wagging the dog and the generals in charge for 150 years and they never fulfilled their duty to us to protect our National Trust and to fully inform the correct civil authorities--- the people of this country--- in all this time afterward.

The graft and corruption that began with Abraham Lincoln and Ulysses S. Grant has simply continued on.

Instead of working to restore the lawful government owed to this country, our military leaders have played patty-cake with a bunch of political lobbyists similarly "occupying" the seats of the Municipal Government we are owed.

Now that you realize that the members of "Congress" are not acting as fiduciary deputies of your State, and are instead operating as lobbyists for their "political party" ---- that is, their chosen gang of thieves --- you can better grasp the whole situation.

Both the Territorial Government run by the military and the Municipal Government run by the political lobbies are run amok and have been for a very long time.

And you? Well, you've been more than half asleep, doped up with deliberately promoted delusions and false assumptions. Our own employees have been undermining our lawful government and pillaging us for over a hundred years.

That's why the Biggest Housecleaning in History is now necessary.

Donald Trump is doing his part to clean up The Swamp. He promised to return this country to the people and he is doing that. But the "people" also need to get their poop in a group and be ready to undertake the serious responsibilities of self-governance. We have to be ready to receive back control of our country.

That's why I have been beating on everyone for months to get your local Jural Assemblies set up and operating.

Get involved. Get on your feet. This is your country. This is your inheritance at risk.
