We have completed work on the ABA Lien --- the first bite at the whole criminal infrastructure upholding, orchestrating, and automating the Great Fraud. It is a mammoth work.

The work began more than three years ago when Coloradan Steve Curry began due process of an International Obligation Lien against the American Bar Association and International Bar Associations.

This now-perfected lien worth \$279 trillion dollars has been cured, a sovereign-level Bill of Lading has been brought in favor of The United States of America (Unincorporated) and a Writ of Execution has been issued.

It is important to realize that a great deal of Due Process has gone into this and every effort was made to provide recourse and rebuttal opportunities and chances to cure in hundreds if not thousands of court cases all over America.

The continued lawless operation of the private territorial and municipal courts acting in Bad Faith and Color of Law on our soil has resulted in vast damage to our states and our people--- and a generation of smug lawyers who think that they can get away with murder on paper and no end of other paper terrorist activities without it ever coming home.

Welcome to today, which is the beginning of tomorrow.
