Now, if only this young man and the Rhode Island House could be woke up all the way and educated about the actual facts--- then (1) he would know that he and his firearms are not subject to anything they say or do, so long as he maintains his birthright political status, and (2) they would know that they are a bunch of lying, traitorous, foreign hypocrites with no business in the Rhode Island State House.

It says "State House" not "State of State House".
