

Animals, Too?

From James C. Belcher

This has got to stop.

<https://www.worldtribune.com/report-mrna-vaccines-are-being-injected-into-livestock/>

All these corporations have to be involuntarily liquidated and if the Pope won't do it, the rest of the religious leaders have to rebel against the leadership of the Roman Catholic Church to make sure that this gets done in short order.

Certainly, our land and soil jurisdiction governments are completely appalled and against this ugly and totally unaccountable behavior on the part of the Pope and the Roman Curia, the various world military organizations, and others who have mindlessly gone along with this "agenda" of death and pollution of the genetic code of life.

All the corporations responsible for this must be liquidated immediately without recourse. All corporate veils removed. All public bankruptcy protections denied. Now. Everyone being addressed by this email is responsible for responding and taking action to suppress this criminality at its roots and address its motivations.

It does no good for the Pope to wave his hand over the suffering of the Congo and at the same time fail his duty under Ecclesiastical Law. It's his right and also his duty to put these sick, diabolical corporations out of their misery.

Joe Biden must be removed as the "President" of the failed UNITED STATES, INC. successor organization and the Chinese Government needs their complicit corporations put out of business right along with all the other colluding criminal enterprises: WHO, INC., WEF, INC, World Health Organization, Inc., World Economic Forum, Inc., Pfizer, Inc., and so on.

There are those yelping like wild dogs and saying, no, no, we can't afford to trash all these major corporations! But we must do so and do so with alacrity, before their unbridled and mindless profit-seeking behavior destroys the Earth and everything on it.

Shut it down and do it now.

James Clinton Belcher, Head of State

The United States of America
