

International Public Notice: Announcement

By Anna Von Reitz

As of [yesterday](#), at 1 PM Eastern Standard Time, the United States, Incorporated, ceased to exist. An emergency appropriation of Territorial funds has provided a three-month transition period during which truly essential services will be further identified and extraneous or illegal services will be shut down.

Those present in this country will have noticed that the Internal Revenue/IRS offices in the States have all been shut down and no longer have mailing addresses that work. This is because these organizations never had any right or reason to be in this country demanding payments from average Americans who were never employed by nor knowingly associated with the Federal Government.

The issue of whether or not a "payroll kickback tax" can be attached to Federal Employment as a condition of employment is yet to be addressed, but as all kickbacks are illegal and extortionary in nature, we are firmly of the opinion that these demands on Federal Workers are now and always were both illegal and unlawful and that the institution of the Internal Revenue Service/IRS should be unequivocally and universally liquidated.

Another result of the changes being made is that the American Military is a military service again, no longer being operated as a mercenary service, and the "war" that has been promoted on our shores for the past 160-plus years, is ended. Some people are still not aware of this fact, but they are being diligently informed.

There has been an unfortunate delay in deploying disaster relief and assistance throughout the Southeastern United States which were hard hit by high winds and flooding associated with Hurricane Helene, as jurisdictional issues were not immediately apparent and resolved, resulting in mass confusion and overall lack of coordination of rescue efforts.

This was hopefully resolved by directives issued to the Joint Chiefs of Staff [this morning](#), ordering the military to provide all helicopter assistance available or available under civilian contract to provide search and rescue operations throughout the region.

The Federation of States has ingress/egress treaties allowing Federal Military and State of State National Guard units to provide this service to the States and within State borders during natural disaster calamities and the Joint Chiefs have been fully informed and authorized to provide search and rescue equipment and personnel and fully inform the State of State Governors regarding search and rescue operations deployment and funding support.

The Joint Chiefs are additionally hereby instructed to deploy and make available mobile military hospitals, camp kitchens, sanitation services, water supply units, communications support and Army Corps of Engineers support together with all necessary personnel and supplies needed to construct emergency bridges and roads.

The Federation of States does not need to make appropriations through any Congress as we are not under the Constitutions and are instead a direct instrumentality of the States responsible for the safety and protection of the living people and their property assets.

We maintain that protection of the living people and their assets is the only rightful, reasonable, and proper reason for any government to exist, and that any failure to protect both life and property assets is a failure of government.

Our Peacekeeping Task Force is on the ground and in communication support of the State Assemblies in Virginia, North Carolina, South Carolina, Georgia,

Florida, Alabama, and Eastern Tennessee where there is widespread damage and a massive death toll that is as yet unreported.

In some areas, entire towns have been swept away. There are reports of rescue operations being hindered by local and state police trying to control various operations areas to the detriment of actual rescue efforts in the Black Mountain area of North Carolina. There are reports of entire cemeteries and morgues being washed away.

Let everyone and every level of government involved work together with one single-minded accord and with one purpose --- to preserve life and restore basic public services in the flood ravaged areas. Be practical about it and do not allow anything to interfere with the rescue of the living people. That is Job One. Whoever does it, civilian or military, and however it is accomplished, get it done.

Our Federation of States has a long-standing Alliance with Russia (1858) which both we and the Russians have always honored; there will be no war with Russia. Our nations are allied and will continue to work together in the interests of mutual prosperity and peace on the Pacific Rim. Funding to the Ukraine Proxy War by the USA, Inc. is a private matter best addressed by invoking Public Law against this foreign corporation, which was organized for "lawful purposes" and is not allowed to invest in unlawful activities carried out by Third Parties.

Similar to using Jews to commit usury on behalf of Christian Monarchs in the 1300's, or the various iterations of Congresses using Agencies to promulgate law, accountability for these investment activities rests on the British Territorial U.S. Congress; any continuance of using a Proxy War and Proxy Government in the Ukraine to promote war against Russia is not only a violation of our stated Will to honorably maintain our alliance with Russia, but a violation of international and commercial law.

The funding that has been syphoned off the China Trade will be restored, so that China need not be desperate or think in terms of economic warfare or actual warfare to realize recoupment. A normalization and recoupment

process will allow not only repayment but assistance to China to solve its food resource and energy and sanitation and housing needs.

Our actual government which has always been here despite false representations pretending that we were "missing" and "in interregnum" is committed to peace and prosperity for everyone. As such we promote mutual benefit and mutual understanding. The crimes that have been promoted against all of us under color of law for commercial benefit need to be recognized for what they are: crimes.

A final piece of the puzzle involves restructuring the banking system. We have firmly rebutted the use of the "United States Note" as a Debt Note backed by our purloined assets; as faithful Fiduciaries we do not agree to pay fictitious debt, and instead direct that the "United States Notes" be immediately redeemed and reissued as Credit Notes.

A general revaluation of currencies against the gold standard will be commencing at the public level to establish new commodity valuations and address the widespread rigging of the commodity markets worldwide.

American asset-currency investors are advised to negotiate currency exchanges through their own Global Family International Trade Bank; it's safer and yields more value to the investor.
