Another Iteration of The Big Lie

By Anna Von Reitz

As I always say, if they could lie about dropping "Atom Bombs" on Hiroshima and Nagasaki, they can lie about anything. And do.

That's what the Children of Satan do. A lie is a prayer to their Father. So they really get into their profane religion; day after day, they placate the Spirit of Falsehood in every way possible.

So you must learn to discern what they are doing and use your God-given horse sense to figure things out. I call this using your "Shinola Sensor".

So use it. Look. Think. Learn.

Often, their most successful scams revolve around something new --- something you never heard about --- like the Atom Bomb. The newness allows them to make up whatever drivel they want to make up, and because it's "new", you accept that whatever they tell you about it is true.

You have no knowledge of it, because it's new.

You have no opinion of it, because it's new.

And if it has something to do with science and it's new, you probably don't feel competent to form an opinion about it, and rely on "the experts" ---- and how much does it cost them to buy experts?

So now that you are thinking about it and screwing up your courage to look behind the curtain at the ugly old man pulling the strings, see this:
