By Anna Von Reitz

America has never been a “democracy”. The British Territorial United States — which is a British Territorial Commonwealth under contract to provide our States with certain “enumerated Services” is a democracy.

America has never been a “plenary oligarchy” or municipal government functioning as a Roman Patriarchal Republic or “Civil” Government, either.

America is composed of fifty republican states that are the Union of unincorporated Counties within the physical boundaries of each State.

Incorporated entities cannot serve as true Counties nor as true States and incorporated Legislatures have no ability to pass laws affecting living men and women.

So we are not “a” Republic, not a “democracy” and not the subjects of any foreign statutory law. These plain facts need to be firmly understood by every American.
