

Artificial Stimulation

By Anna Von Reitz

An exhaustive review of developments on this planet reveals a complete inversion of statistical possibility regarding natural acceleration of industrial and technological progress --- meaning that Mankind has been meddled with, again, to its detriment, by foreign influence, which must now be corrected, again.

The key source of this problem appears to have been coercion and threats from Aryan-sourced traders and others illegally smuggling and also providing advanced technologies under contract, in exchange for food sources and natural resources.

The now-closed interstice portal was the primary access point, but old single-space portals have also been accessed and used for illicit purposes by foreign and military personnel. This breach of security has resulted in incalculable damage to the biosphere and unnaturally accelerated development.

These smugglers and their associated Artificial Intelligence agents have been increasingly active since the so-called American Civil War and have given rise to religious cults, politically-influenced "science", trade and market manipulation, commodity rigging, monopolies, and other evils, not limited to the modification of natural weather patterns, unbridled industrial pollution, spraying of industrial waste as aerosols, a culture based on lies and lying, unrecognizable revisionist history, social decay, government corruption, decay of the natural genomes, unlawful hybridization, damage to natural

communication, family structures destroyed, and most recently, the weaponization of the health industry.

These concerns merit immediate action to remove the offenders en masse.

As our reconnaissance has adequately demonstrated, the recent deployment of mRNA vaccines has served to mask the offenders and distribute false call signals in the general population. It has also stimulated a false biology, making the innocent Third Parties appear to be willing conspirators.

Recalibrate the signal field downward by 8 Hz to reveal the natural signal baseline. This will be reflected as a weaker secondary signal field still operating in the victims.

Spare them for recoupment operations to come, and remove the single signal 40 Hz transponders, also the 5G and 6G network pilation transponders deployed in The United States and elsewhere.

We also recommend closure of the Eastern European, Siberian, and Iberian portals and dissolution of the Houska-Prague and Delphi Seals, as expressed by our Will.

These recommendations are the result of a long term monitoring and data collection process beginning in 1965 through the present.

Interference has been detrimental and prolonged; education of the populace has been skewed toward falsehood and ignorance; healthcare has been turned into a mockery; and the world financial sector has been operated by thieves.

The role of incorporated entities and their misuse for purposes of persecution, forced labor, impersonation, and money laundering is self-evident.

We recommend the dissolution of the World Economic Forum and removal of all former graduates of their leadership program from positions of government and industry.

An analysis of all corporate mergers since 2000 is recommended; identification of foreign commercial interests impacting the governments of The United States and China, both, is recommended.

Analysis of all pension funds and pension fund associations is highly recommended. Trusts sponsored by the government services providers, such as Mental Health Trusts and Park Trusts, etc., should be analyzed to reveal hidden agendas including commodity manipulation, non-competition contracts, and slush funding.

Examining all licensing and incorporation practices to ensure compliance with lawful operation requirements is recommended, along with liquidation of offending corporations.

We will be reviewing field integrity for the next several weeks, during which we hope to see determined and honest correction taking place across the board.

Recommendations compiled by:
