

## International Public Notice: The Bank Fraud

By Anna Von Reitz

According to Webster, the meaning of "purloin" is: to appropriate (something) wrongfully and often by a breach of trust.

This is exactly what our British Territorial and Holy Roman Empire (HRE) Federal Subcontractors have done, so keep the word "purloin" in focus and understand that it is key to understanding the bank fraud we are stuck dealing with.

When Abraham Lincoln pulled his switcheroo and substituted a British Territorial U.S. Congress for the American Congress, the foxes were left in charge of the hen house, and foreign interests gained control --- illegally and fraudulently --- of our purse-strings.

From that day to this, the constant claim of the Perpetrators is that they "represent" us, but they don't disclose that they are literally impersonating us. It's a deceit. People assume that they are representing us in the sense of political representation, but no, they are literally impersonating us without our knowledge or consent.

They literally steal our identity. They literally impersonate Americans.

With these facts in mind, here is how the bank fraud goes:

The British Territorial U.S. Congress "borrowed" (purloined) our silver and gold. That indebts their government to us and obligates their foreign democracy to not only pay back the precious metals but pay interest on this "loan" --- which no American State or Congress ever authorized.

This is what purloin means. They occupied a position of trust, as Federal Subcontractors obligated by contract to serve us in "good faith", and they abused that trust to seize upon our assets and make "loans" of our assets to benefit themselves under conditions of deceit.

Next, the Perps deposit our silver and gold in "Federal Reserve Banks" which are private operations owned by a consortium of mostly foreign private banks deliberately misrepresenting themselves as if they had something to do with our American Federal Government --- long after the Federal Republic ceased to operate. This is another deceit.

Upon receiving our gold and silver, it becomes both an asset and a liability for the banks. From their perspective, they owe it back to the British Territorial U.S. Government that deposited the metals, while the British Territorial U.S. Government owes the metals, plus interest, back to us.

So now both the British Territorial U.S. Government and the Federal Reserve Banks are indebted to us, sequentially, but the British Territorial U.S. Government has established itself as a middleman and "apparent" owner of the precious metals on deposit with the Federal Reserve Banks.

As far as the Federal Reserve Banks are concerned, they can shrug and turn a blind eye as to who the actual owners are. They can play Sergeant Schultz, and say, "Hey, the British Territorial U.S. Government deposited all these precious metals. So far as we know, that's where the metals come from. That's who owns them."

But remember, the precious metals never belonged to the British Territorial U.S. Government. They belonged --and still belong-- to us, the American Government. The British Territorial U.S. Government has never returned the metals to us and has never paid us any interest on the "loan", so, obviously: (1) the metals on deposit with the Federal Reserve Banks are still ours -- we haven't been paid for them; (2) the British Territorial U.S. Government isn't playing a straight game with us. If they were, they would have this "loan" of our assets incorporated in the public records, and they'd be paying interest on it.

Next, the Federal Reserve Banks create ten times the value of our precious metals as "credit" using their fractional reserve banking scheme, and they loan that credit to all the banks in their network at interest. This is called the "prime interest

rate". This is what Jerome Powell is always scrabbling around about. It's the cost to the other banks to use our purloined credit, even though the Federal Reserve Banks misrepresent it as credit belonging to the British Territorial U.S. Government for the reasons stated above.

These banks pay the prime interest rate to the Federal Reserve Banks, and then they repeat the process. Whatever they borrow from the Federal Reserve, they inflate it using the same fractional reserve scheme. Whatever Federal Reserve Notes they borrow, they pay the "prime rate" on this loan up front, and issue ten times the net amount as credit, which they loan out to us at much higher interest.

Please note that it is still actually our credit that they are all gratuitously inflating and loaning back to us, at interest.

And all these "National" and "State" banks play the same "shrug and wink" game that the Federal Reserve Banks play.

Just as the Federal Reserve Banks look the other way and credit the British Territorial U.S. Government as the Depositor (of our assets), the subsidiary and franchise banks in this system credit the Federal Reserve Banks as their Depositor, and think that they are in debt to the Federal Reserve for extending its credit to them --- which allows them to make loans to us.

So how does the Federal Reserve make its money, really? It collects the seigniorage off of every promissory note it prints, collects the prime interest rate off every promissory note they loan the other banks, and invests this ill-gotten gain in stocks, bonds, real estate....

At the end of the day, all this credit, and all the assets, have been purloined from us ---- and the value of our own assets and our own credit has been loaned back to us at interest, while we have been left in the dark about this cozy arrangement (another deceit and failure to disclose) and maligned as the Borrower, when in fact, the British Territorial U.S. Government and the Federal Reserve and all the banks in the Federal Reserve network are the actual borrowers.

And like the British Territorial U.S. Government, the Federal Reserve Banks have failed to make any repayments to us of our credit and failed to share the profits realized from the loan of our credit, with us.

They are all in debt up to their hair follicles to us, indeed, they are insolvent; but until recently, they didn't care, because they figured that the actual American Government was "dead" and that we would never come home again and never figure out what they did and never hold them accountable for it.

Think again.

When we say that we are their Priority Creditors and claim that they are engaged in an active and illegal mercenary "war" intended to kill their creditors, we aren't kidding. These nogoodniks are attacking and killing the living people to avoid paying them back, and to generate "service" billings for themselves for doing so.

This is how evil, twisted, upside-down, backwards, illegal, unlawful and immoral this whole situation is and has been for six generations.

If you track your way back through the Mess and the slime, this is what you find: the Federal Reserve and its member banks owe us our credit and interest on it; the British Territorial U.S. Government owes us our precious metals and interest on the value.

And all they are doing as "correction" is trying to obscure the facts, blame their victims, and kill a lot of innocent people under smokescreens of pandemics and "bad weather" events that they themselves have artificially generated and only God knows what other schemes these criminals have.

To date, the guilty British Territorial U.S. Congress, which has no right or valid reason to continue pretending that it's our Congress, is still sitting ensconced in Washington, DC, still impersonating us and our lawful Fiduciary Deputies, and still finding ways to abuse our trust, our money, and our lives --- while evading their own obligations to us under contract.

Most recently, they have hired former UNITED STATES Agencies --- DOD, FEMA, BATF, et alia, to work for them, and have extended funding to these entities for another three months, during which they hope to carry on with the election of their new corporation "President" and inflict additional damage on their innocent, clueless creditors.

The picture overall is one of deliberate and criminal Gross Breach of Trust and violation of their Service Contracts, both The Constitution of the United States of America, and The Constitution of the United States. It's a history of purloining

assets and misappropriating credit. It's a history of deceit, war-mongering, and crime at the hands of out-of-control foreign subcontractors and public employees.

It's our history and we have to own it, but it is also our right and responsibility to say, "No." --- and to be obeyed by all our government subcontractors and by any subcontractors of theirs, too. It's also our right and responsibility to fully inform the banks and hold the banks liable for their part in this gigantic Mess. Their cover is blown.

To the Pope/Patriarch of the West, to the British Monarch/Emperor, to the Lord Mayor of the Inner City of London, to the King of Scotland: We are not deceived. The debt is all yours. And the British Territorial U.S. Congress is guilty, en masse, of intergenerational treason.

Everything that has been done here and which has yielded these results, has been done via institutionalized fraud and deceit, crimes of personage and barratry, illegal confiscation, embezzlement, counterfeiting, human trafficking, illegal and unlawful regulatory activity, inland piracy, genocide, and all accomplished under color of law in gross breach of trust and violation of our public service contracts.

Notice to Principals is Notice to Agents; Notice to Agents is Notice to Principals.
