

American Civil War, Or, Stop Being Stupid Part 9

By Anna Von Reitz

Okay, folks, the results are in and the results are these: there is no such thing as the American Civil War. No War of Secession, either.

There is no Declaration of War commencing such an action.

There is no Peace Treaty ending any such action.

It does not exist as a war between states, between nations, or nation-states.

What we have been taught to call the "Civil War" or "War of Secession" was never a war at all.

So what was it? It was an illegal mercenary action.

And it still is. The so-called "war" that isn't a war is ongoing. It has been staged as a perpetual war for profit on our soil.

Those criminals responsible for setting up the scam are long dead.

Those who have perpetuated it and who continue to support it deserve to be made aware of the facts and given a chance to cease and desist---- and if they don't, they deserve to be hunted down as international criminals, tried, and executed for crimes against humanity so dire that they beggar description.

And all of this, with all its unspeakable consequences for us and for others, has been ongoing for 150 years, right under our noses.

So here is the Public Notice:

Both the United States, Incorporated, and the United States of America, Incorporated, their heirs and assigns since 1860, have been operated in Breach of Trust and contract and both have violated their charters and have engaged in unlawful and illegal actions against the innocent American states and people;

Both the United States, Incorporated, and the United States of America, Incorporated, their heirs and assigns since 1860, have operated under color of law on American soil and have presumed upon and against their unwitting hosts;

Both the United States, Incorporated, and the United States of America, Incorporated, their heirs and assigns since 1860, have practiced inland piracy, kidnapping, enslavement, extortion, racketeering, conspiracy against the actual Constitution, genocide, war for profit, unlawful conversion, bank and securities fraud, constructive fraud and other crimes against the American people and have sought by various means the illegal overthrow of our lawful governments and the pillaging of our estates;

Both the United States, Incorporated, and the United States of America, Incorporated, their heirs and assigns since 1860, have promulgated constructive fraud and used deceptively similar names to confuse the American people so as to seize upon our names and estates and secretly hypothecate debt against us and our assets without our knowledge or consent;

These non-sovereign incorporations have served as international crime syndicates benefiting foreign powers and by Law they must be liquidated and their assets must be returned to their Priority Creditors, the American states and people.

Everyone please stop for a moment and consider the immensity and duration of the fraud that has been played upon us by men and women who have sworn oaths to protect us and our property interests?

Think of what this information about the so-called Civil War actually means: not a single action undertaken by the "federal government" since then has been valid.

Nothing that has happened here since 1860, and quite likely before then, too, has been honest. Absolutely all of it has been conceived in fraud, implemented by fraud, and enforced under color of law by people functioning as criminals in nice suits.

This explains why the sum total result of the so-called Civil War was to enshrine slavery instead of abolishing it, and to move slavery out of the private sector and into the public sector.

Instead of men owning men, corporations masquerading as governments have claimed to own men via proxy, using legal chicanery, non-disclosure, and deceit to accomplish these ends.

They have seized upon our given names while we were still babes in our cradles and claimed all assets held under our names--- our bodies and souls, our land, our homes, our businesses. They have declared that we are 'decedents" with respect to our own identity, our own birthright inheritance, and falsely told the rest of the world that we agree to all this in "equitable exchange" for "benefits" that we paid for ourselves.

If you are working for the "federal government" in any capacity at all, search diligently for other employment and consider well the source and the authority for any orders you are given. If you can't do something in a private capacity---- for example, can't assault, can't pillage, can't murder---- you can't do it in a public capacity, either. Doing such things in a uniform just makes it worse.

Come now, join with me in giving all the members of the "Congress" sitting in Washington, DC, a rousing chorus of, "Take Your Limey Asses Back Out to Sea"

followed by a send off round of "What Frigging Civil War?" and "Here We Go to Postal Court Among the Leaves So Green", "Ballad of Elliot Ness" and "Communists, Fascists and All The Rest".

Sing your hearts out, Ladies. And all you veterans out there? Send the Secretary of Defense Notice that you have retired from all military duty, severed all political association, and returned to the land jurisdiction of your native state.

Suck it in, Shorty. Realize that you have been misused the worst of all. You've been used as gun fodder for the British Crown and left as a slave to pay their debts. All to the tune of "Yankee Doodle Dandy". So return their commission with your compliments and don't let the screen door hit your rump on your way out.

After intermission, please join me for a Sing-Along featuring "Put a Cork in It",

"Requiem for a Fake Nation", "Criminals in Robes", "Battle Hymn of the Actual Republic", "Go Tell It On the Intercom", "Do Your Ears Hang at All?", "Black Hats in the Sunset" and that perennial favorite, "What's It All About, Donald?"
