

International Public Notice: Black Hats and Black Rocks

By Anna Von Reitz

For everyone who still needs to know, the United States, Inc., the Source of all that money everyone seems to think they have to spend, is gone. The Involuntary Chapter 7 bankruptcy is over.

The corporate office of "President of the United States" is meaningless and permanently vacated.

The only office that still matters is President of the United States, Unincorporated.

The self-appointed Trustees who have no vested authority to do any of this, the members of the U.S. (British Territorial) Congress, have elected to pay for another three months of "services" from the former Municipal Government Employees.

Instead of using the money to wind down their operations and soul-search and provide some actual public service, the Black Hats chose to create and steer a hurricane deep into the American homeland causing devastating damage in more than a hundred counties in six States.

Kamala Harris and hubby have investments in Black Rock-connected Lithium mining claims in the destroyed Castle Rock, North Carolina area; the mining permits were set up just two days before Hurricane Helene demolished the small town --- which gave unnamed "federal" officials the idea that they could claim the land under Eminent Domain and profit

themselves while divesting the actual owners of the value of the lithium deposits.

Every person and every business interest and every agency involved in any of this deserves immediate arrest and prosecution to the fullest extent of the law, including those members of the U.S. Congress who voted to give these criminals a three-month extension.

All functions of the former Municipal Corporation and its franchises should have been shut down as of the first of October.

We believe that the people of North Carolina, the actual owners, who have not voted to give away any "federal" parcels in their State of the Union, will speak and will take definitive action to make sure that those responsible are held both personally and commercially liable.

For those not quite following along: there is no such thing as a Federal Right of Eminent Domain and never has been.

And as the State-of-State operations are merely franchise corporations of District of Columbia parent corporations, there is no "State of North Carolina" competent to exercise any Eminent Domain, either.

Additionally, as the "State" these miscreants claim to operate is in fact an unauthorized State Trust they cobbled together --- a legal fiction that cannot stand in the face of the actual State Government operated by the People of North Carolina, the State Trust has no vested powers of Eminent Domain.

Black Rock and the Black Hats are all out of luck. The rules and the players have changed. That land and soil belongs to the living people of North Carolina, not any corporation.

The Speaker of the U.S. House of Representatives is now under the gun to: (1) cut the three-month extension of funding that the U.S. Congress granted to the former Municipal Government Employees and (2) re-allocate funding

from that and from other appropriations to things like the proxy war in Ukraine and the care of illegal aliens, to fund disaster relief.

If this is not immediately done, the Speaker of the U.S. House of Representatives must be arrested and prosecuted for Treason. He has no immunity, because he is not serving in any actual public capacity.

Survivors from Castle Rock, North Carolina, are invited to contact us with information concerning the individuals and agencies that addressed them and told them that their town would be bulldozed, dead bodies and all, and that their land was being seized under Eminent Domain.

We will all have something to say about that, to those employees and to you, to comfort and restore you, and appropriately punish them.
