

A Canadian Leveraged Buy Out of the US Corp? Hahahahahah!

From Anna Von Reitz

Today I was given a copy of a Ben Fulford story in which he floats the idea of a Canadian "Leveraged Buy Out" of the old US Corp.

Hahahahahah!

An "offer" brought to you by the same people who arranged to have you pay off their mortgages under conditions of violent fraud.

I "counter-offer" that the Priority Creditors are here with their fully restored international standing, including their agricultural liens, and we are fully funded, too, so why not toddle on down the road and give someone else a good laugh?

We understand the fraud, boys. The jig is up.

A full list of "items" will be forthcoming to the Prime Minister. It won't include a Leveraged Buy Out by Canadians.
