

# International Public Notice: Conflict of Interest and Our Objections

By Anna Von Reitz

It has come to our attention that the remaining Federal Subcontractors, two parent Municipal corporations inhabiting the District of Columbia, have contracted with each other.

Those representing the Municipal United States Government have contracted with the Territorial United States Government such that Joe Biden is proposing to act as the President of the United States of America, while basing his office and authority on The Constitution of the United States.

This represents a basic usurpation of power reserved for the States and people of this country, and the creation of a conflict of interest to which we, the Delegators of all Delegated Powers, object.

It was never intended, inferred, implied, or allowed by any Federal Constitution that Federal Subcontractors would contract with each other, as separate entities, for services for themselves.

This leads to a situation in which the parent Municipal conglomerate generally spoken of as "the United States" incorporated has hired the Territorial service provider we created for our own uses, to provide itself with military services for hire.

So, the United States, Inc., has purchased the services of the United States of America, Inc., for its own protection, which potentially places both corporations at odds with their actual employers and priority creditors.

This is staging, via conflict of interest not allowed by our contracts with either service provider, to create a civil war in this country -- at the hands of our employees.

We object to any such commingling of Municipal and Territorial roles and interests, especially any such commingling by contract that could confuse the allegiances of both Service Providers and lead to armed conflict on our shores.

Our public employees at all levels, Federal, State, and State-of-State, are meant to serve us and our States and our interests, not their own. We pay them for their service, not their self-interest.

We see Joe Biden's offer to function as the President of the United States of America (the Territorial Presidential Office) under the auspices of The Constitution of the United States, as a blatant affront to our constitutional system of government.

Federal Subcontractors exist as a result of three (3) separate constitutional contracts and wield enumerated delegated powers when these separate contracts are fulfilled; absent that, there is no basis for these corporations to exist and nothing for them to do.

If the entire reason for these District Corporations to exist is to fleece their employers, and usurp powers never granted to them, we can hire the mafia instead and get a better deal and more performance.

It has also come to our attention that in an effort to promote legitimacy for the U.S. Armed Forces, all members of such Armed Forces are now technically considered Naval Officers and Enlisted.

This, too, has no authority or basis in custom or Law, and has been used to try to paper over the fact that our own military has been unlawfully converted into a mercenary force and misdirected by the same Parties responsible for trying to redefine the American Armed Forces as an Auxiliary Force of the U.S. Navy under the command of his Royal Britannic Majesty.

We object to these manipulations and "redefinitions" as the lawful government of this country in International Jurisdiction, and as the Principals and Inheritors of the Constitutions, which are stipulated and explicit Service Contracts that limit the role of His Britannic Majesty to that of a Trustee on the High Seas and Inland Waterways.

Also with respect to these changes in the Service Contracts made without our knowledge or ratification, and deemed to exist only on the basis of acquiescence, we object to the proliferation and use of Admiralty/Maritime Courts on dry land, and their pernicious misuse to address our people under the force of an illegal and immoral quasi-military (mercenary) occupation of our country by the British Crown Corporation.

The grant of all power over American Admiralty and Maritime matters was granted to the Federal Republic under the auspices of The Constitution for the united States of America (1787), and upon the dissolution/incapacity of the Federal Republic, returned by Operation of Law to the Delegator and Grantor of those powers, our Federation of States. It did not magically devolve upon any Trusteeship of his Britannic Majesty.

The Constitution for the united States of America (meaning the Federal Republic and the 1787 Constitution) grants to the Federal Government (again meaning the Federal Republic) "all cases of admiralty and maritime jurisdiction".

In the absence of the States of America (our Confederation of States) and in the absence of the Federal Republic, the powers delegated to them return to the Delegator, our Federation of States doing business as the unincorporated United States of America, not to the British Territorial version doing business as "the United States of America, Incorporated".

This usurpation of power based on a similar names deceit and widespread efforts on the part of the Perpetrators of these crimes to keep the substitution secret as a matter of their own separate "National Security", has run its course.

We do not intend for our run-amok British Territorial and Roman Subcontractors to continue operating in this criminal and unaccountable manner, based on our purported absence and equally purported acquiescence to their every whim.

His Royal Britannic Majesty is owed no trusteeship on land and the British Territorial Government has no basis in fact to claim any such position or authority with respect to our States; likewise, these Parties have no excuse for their usurpation upon our grant of power to other, former, Federal Subcontractors, allowing them to come in and run our courts of admiralty and maritime jurisdiction.

The situation would be analogous to hiring Joe American to mow the lawn, and upon Joe being injured, having a foreigner named Jose show up and take over his job, with nobody being the wiser.

This might be amenable to the extent that Jose fulfills the vacated contract with honor and keeps his nose to the grindstone, but is certainly not acceptable when he does not.

This is precisely the situation we face here and to which we are objecting as a matter of international contract; we do not have a contract with His Britannic Majesty to operate our courts of admiralty and maritime jurisdiction.

Over decades of gradually increasing corruption, these courts have been weaponized to pillage and plunder innocent Americans and an entire registration and impersonation scheme has been developed to support False Presumption of Admiralty and Maritime occupations and activities on land, so as to unnaturally subject these same Americans both to the British Crown and the Monarch operating, as ever, as an Overseer for the Holy Roman Empire.

We are not deceived and we are standing in honor, as the Delegator of all delegated powers, demanding that our Federation of States is the lawful and legal inheritor of all grants of power over cases in admiralty and maritime.

As a matter of international and commercial law, both the Government of Westminster and His Britannic Majesty have had their filthy paws in our business and have been corrupting our courts and impersonating our people --- and have been keeping this secret from their employers, simply because this substitution scheme based on similar names, has been immensely profitable for them.

We are calling upon the international community and upon the High Courts of the world, upon our own shanghaied military, and every man who has a conscience, to peaceably return American courts to American control, and return the incorporated Federal Subcontractors to their stipulated roles.
