

Criminals On Our Shores -- Banking, the Global Reset, A Sidebar Ruminations

For those just now waking up---- the Federal Reserve is not and has never been any part of our government. It is a mostly-foreign private association of banks operating as a criminal cartel on our shores. The Fed was invited here by other criminals impersonating our lawful Congress of the United States more than a century ago. The details of how this happened are presented in our sworn and published affidavit of probable cause, "You Know Something Is Wrong When....An American Affidavit of Probable Cause" and The Creature from Jekyll Island.

Second, at the end of the Second World War the Allies set up the "Global Debt Facility" as a depository with the intention --- at least on paper --- of using this international collateral for the benefit of Mankind.

So much for good intentions and public relations. Of course, much more sinister and self-interested agendas were in play---one of which was the rape and pillaging of America and the dispossession of its people via fraud, misrepresentation, and deceit.

Attached you will find nine (9) important documents that establish at least one (1) of the several versions of the Minesfield Crossover Agreements alleged to exist and referenced by Ms. Hudes, and also a couple pages from the Secret Book of Redemption. This extraordinary work explains how the Federal Reserve self-sabotaged its fiduciary responsibilities by introducing deliberate errors in the issuance of bonds and other documents so as to provide a predetermined excuse for not paying legitimate debts when they came due.

The Federal Reserve has also been instrumental in the Federal Reserve Note Scam and the enslavement of Americans mischaracterized as British Crown subjects.

A "Federal Reserve Note" like any "note" is a Promise to Pay----like a bond is also a promise to pay at a later date. This particular "note" was given a very special, very beneficial backing--- members of Congress acting in treasonous self-interest established a fixed "dollar for dollar" exchange rate between the "Federal Reserve Note" and our actual United States Dollar.

As a result, the Federal Reserve Banks were enabled to pawn off paper I.O.U.s in exchange for our actual gold and silver----and also for our unpaid labor and other resources.

To avoid paying these I.O.U.s they simply collapsed the old "Federal Reserve System, Inc." and entered it into bankruptcy. All our gold and silver was stolen and transported overseas in

"equitable exchange" for worthless paper, and then even the debt represented by those I.O.U.s was discharged in bankruptcy---which should have never been allowed.

That answers the question of where all the gold in Fort Knox went.

Bill Clinton had the last of our reserves shipped out during his final years in office. He also pretended to have the authority to sell off our homes, businesses, roads, bridges, and other public infrastructure to foreign investors. Literally billions of people globally plus 390 million Americans have been victimized and defrauded. Governments all over the world are looking to us to make good on all the private Federal Reserve Notes and all the bogus sales of our property that these con men pretending to represent us have sold to investors in our names. Literally.

That is who and what the Federal Reserve is---- an international crime syndicate brought here and allowed to run rampant by the British Monarch who is supposed to be our Trustee on the High Seas and Inland Waterways, expedited by our own employees and by other people obligated to serve us in Good Faith by every treaty, Constitution, Public Law and trust obligation there is.

The primary beneficiaries of all this criminality are in order of importance: the Pope, the Queen, Jacob Rothschild, and several corporations including SERCO.

The Pope agreed to forgive all "debts" arising from these false claims and agreed to return all American assets to the Americans they belong to. He has also taken other very important steps toward remedy.

The Queen is not eager to give up her ill-gotten gains and neither is Jacob Rothschild, who is still smirking and bobbing, confident that he and his criminal empire will escape the wrath of the world's people and trick them yet again.

There's only one big stumbling block. They can pay off any country on Earth except one. They can't possibly pay back the Americans, who have been the biggest victims. It simply can't be done.

There isn't enough gold or silver to pay back what they owe us already.

That's why from their perspective, they have to do one of two things---- (1) work a final fraud scheme to gain immunity from prosecution and release from their debt to us; or, (2) kill off the Americans to reduce the amount of debt they owe and collect on the million dollar life insurance policies they've placed on each one of us.

But now they have just realized something rather crucial.

As long as there is one American left alive anywhere on the planet, that American can claim back absolutely everything owed to all Americans since this fraud scheme began--- and tracking down and murdering every American worldwide doesn't seem like a viable option.

They have always counted on their control of the "US Congress" as their final playing card. They haven't counted on us pointing out that the "US Congress" isn't our Congress.

Karen Hudes thought she had everything nicely done up in time for Christmas. She had cronies all lined up to accept our share of the gold from the Global Debt Facility. Once they accepted the gold--- "in our behalf"---and accepted all the immunities and guarantees and

releases hidden in the fine print, her bosses would be off the hook, free and clear, able to claim immunity and keep all our assets, too.

Luckily for the "free sovereign and independent people of the United States" the federal toadies don't represent us in this matter and have no basis to claim that they do.

As a Trustee, Karen Hudes and the other 188 Trustees of the Global Debt Facility are in a bind. The Americans are owed their share of the gold in the Global Debt Facility. The Federal toadies have no basis to accept it for us. It isn't in our interest to accept any fine print that gives the Queen and Rothschild and their cronies a "Home Free and Keep Our Assets" card.

And we are in no mood for Trojan Horses.

Those who have been listening to the exchanges between Karen Hudes and I have repeatedly heard her warnings about "World War III" --- any such thing would be precipitated by the efforts of the criminals to assert false claims against us and our assets and their refusal to pay their own debts.

By now the entire world knows that the Americans have been the innocent victims of fiduciary trust fraud on an unimaginable scale, and millions of Americans know it, too. The Russians and Chinese know who to blame. If the Russians and Chinese want gold, they aren't coming after us. Our pockets have been picked clean. Nobody is going to blame us for the lies of the Federal United States. It's all too apparent who the criminals have been and it is also too apparent that the American people have suffered along with the rest of the world.

Ms. Hudes would have the world believe that I am working for some Evil Network of Global Control and am single-handedly holding up the Global Reset and preventing poor people all over the world from receiving their fair share of the Global Debt Facility gold. I say that Ms. Hudes is accusing me of what she is doing herself. She is trying to gain immunity for her bosses---some way that they can wash their hands and avoid being responsible for their insurmountable debts to us and the rest of humanity. It is their refusal to come clean that is holding up distribution of Global Debt Facility assets.

They, not we, are keeping the gold hostage, trying to use it as leverage for themselves, and trying to trick us all into accepting a bowl of porridge for our birthright.

Under their current plan the same corrupt politicians retain control and all the benefit of the gold goes to prop up national currencies which are nothing but a breeding ground for manipulation, fraud, and profit for the usual suspects.

The only benefit to the people Ms. Hudes can suggest is that they will no longer have to pay interest to the banks on the money their governments mint or print. It will mean the end of usury she says.

Pray tell, why should anyone have to pay interest to the banks in the first place?

Nobody's currency has been backed by the banks. It has all been backed by the labor of the people and the value of their country's land, commodity, and product assets. The interest we've all paid to the Federal Reserve --for example-- was nothing but another gratuitous fraud scheme, a charge for a non-existent service.

So we just mindlessly donate the gold from the Global Debt Facility to the same criminals who have enslaved and defrauded us and in exchange we get what? The cessation of yet another fraudulent claim?

How does that benefit any poor people? Instead, it benefits the banks. They realize that we are looking at them and questioning their existence and examining their records and their operations and it is just a matter of time before someone says, "Why are we paying interest for a non-existent service?"

Another recurring theme in the dialogue is that I and by implication, "the Americans", are being selfish and unreasonable, and that's why everything is held up. The inference is that I am keeping all this gold from benefiting the poor people of the world and standing in the way of President Marco's Prayer--- but the poor people aren't slated to get any benefit anyway. The banks are just colluding to pay the banks again and making sure that everyone has new poker chips to play in another round of "Global Economy" still completely controlled and manipulated by the same Corrupt Old Bastards Club that brought us to this end.

How about a totally different result? Something that actually helps all the people of the world and permanently solves the problem of idolatry and dishonesty being enshrined at the heart of our economic system?

To the extent that we need a planetary-wide currency system to facilitate trade, this can be accomplished by a simple numeric accounting system. No banks are required. None at all. Just a user friendly accounting system similar to an ATM that accepts deposits, transfers, and withdrawals, a multi-tier computer system similar to the internet devoted to financial transactions, and geeks to troubleshoot.

To the extent that we need to provide for the basic needs of all people this can be accomplished by the same numeric system by providing basic living stipends sufficient to pay for food, water, housing, sanitation, transportation, education, and health care deposited into each individual account. Mankind can finally be set free from want and fear of want. No more starving children. No more charity drives. No more slavery. No more anxiety. No more reason for war and conflict.

Why is this possible? Because money is a symbol standing for the value of our labor and the Earth's natural resources that we are all heir to. Labor--which includes our creativity and inventiveness--and natural resources, are the only sources of wealth on this planet. There is already more than enough value vested in our energy and the Earth's resources to back every possible legitimate need anyone could ever have. There has never been any reason for people to suffer and go without basic needs.

To the extent that we need to provide for new investments, this can be accomplished by giving everyone their own investment account with an additional amount credited to it each year--- and let people loan their investment money without interest to any worthy lawful endeavor they support.

We know that this is a difficult concept for people who have been trained to "work for money" to grasp, but money is an arbitrary product whether it is made from gold or plastic or glass, whether it is in the form of a coin or an accounting ledger. In the past we've made money of different kinds and let these compete like different varieties of chocolate bars--- the Dollar versus the Ruble versus the Yen--- it is time to move beyond that.

People have been wrongly taught to put their faith in money and its external forms, to idolize it as a false god, when in fact, in an honest monetary system, its a hum-drum daily tool.

Those who control the production of money and who determine its accounting are all ----as the present circumstance proves and as 8000 years of history provides---- universally and inexorably corrupted by it and reduced to being dishonest profit-mongering white collar thieves.

Has the lesson been learned yet? Have we all suffered long enough? Senselessly enough? Is it time to do away with banking--- and go to an Open Account System?

There is no reason for any child growing up in any place on this planet to go without food, water, shelter, and anything else that they need. Nor is there any reason for any retiree to go without a solid level of security, comfort, and enjoyment in their old age. The senseless greed of small-minded and smaller-hearted men has perpetuated the Myth of Scarcity in the midst of plenty--and it is nothing but a self-serving blasphemy against Nature and God.

There is also no reason for our money to be outside our local control. No reason for gleaming bank towers overwhelming the skylines of our cities. No reason for the Christine LaGardes of this world waving their hands and blankly discussing how they are going to seize the retirement accounts of senior citizens. No reason for Paul Ryan mindlessly grinning like a Halloween pumpkin as he discusses all the "necessary cuts" to Medicare and other services that people have already paid for umpteen times over. There is no "National Debt". It's all hokum, Smoke and mirrors promoted by thieves. We have only believed in "money" because we have been kept ignorant and deprived of this critical tool by force, and we now fully realize that this Ultimate Fraud has been served to us at the hands of vicious self-serving criminals who profit by it.

There must be a great cleansing of our minds and our hearts, a sucking in of new vision like a rush of air to our lungs. Any hope that the bankers and politicians have had that this would be business as usual ---just a wrap up song and dance to finalize the Greatest Fraud in History--- will be sadly disappointed. The Americans are awake--- fully awake. The doors have been opened that no man can shut.

We are going to demand our share of the Global Debt Facility gold free and clear of any strings. We are going to liquidate the corporations that have acted as crime syndicates on our shores. We are going to lead a profound and permanent reform of the world monetary system. We will be cleaning out vacated public offices from sea to shining sea. We will be reforming and replacing the courts. We will be amending and updating The Constitution and putting an end to any outdated and prejudicial association with Great Britain allowing it to meddle in our affairs. If we get any offer of violence whatsoever from those responsible for these crimes committed against us and the other innocent people of the world, we will join with the Chinese and the Russians and everyone else who has been defrauded by these thugs and we will make sure that the promoters of these crimes never have the opportunity to harm anyone again.

Let that be a promise heard round the world and especially in Washington, DC.
