

Deals With the Devil

By Anna Von Reitz

Here is a good example of how it works:

Evergreen, Inc., is a CIA-owned company.

That means it is a subcontractor of a subcontractor (CIA) of a subcontractor (UNITED STATES, INC.) of a Subcontractor (E PLURIBUS UNUM THE UNITED STATES OF AMERICA, INC.) of a Subcontractor, THE GOVERNMENT OF THE UNITED STATES, INC., of a Subcontractor, the MUNICIPAL CORPORATION OF THE DISTRICT OF COLUMBIA, of a Subcontractor, The United States of America, Inc., of a Subcontractor, the GOVERNMENT OF SCOTLAND, INC., of a Subcontractor, SCOTLAND, INC, a subcontractor of the franchise of the Bank of Scotland, LLC., doing business as a subcontractor of HSBC, PLC., doing business as a Subcontractor of UK, INC., doing business as a Subcontractor of Vatican City. PLC., a Subcontractor doing business as the Urban Trust, PLC, doing business as a Subcontractor of the UPU, INC., doing business as a Subcontractor of Vatican City, LLC, doing business as The Peace Trust, Inc., doing business as a Subcontractor of The City of Rome, Inc., acting as a Subcontractor of the Holy Family of the Inquisition, Inc., doing business as a Subcontractor of the Societe of Holy Doctrine, Inc., doing business as a Subcontractor of the Holy See, Inc, which is a subcontractor of Cede and Company, Inc., and that is a subcontractor of the UN, CORP, which is a Subcontractor of FRANCISCUS which is a Subcontractor of Francis I, which is a Subcontractor of The Holy See.

And now you have a bird's eye view of how interlocking interest organizations (IIO's) work.

And, please bear in mind, that at each step of subcontracting process, the accountability of each subcontractor diminishes relative to the actual contract— and what have you got?

You have Evergreen Inc., owned and operated by Evergreen, LLC, which is owned and operated by Evergreen, PLC.

4500 employees, no obligation to file flight plans (Hint, Hint) and you have a totally unaccountable self-interested for profit corporation abusing the powers of "government".

Evergreen makes money delivering contraband for the CIA, by stabbing lucrative firefighting contracts, and..... by spraying chem trails wastes — incendiary industrial wastes— that kill trees (and create fodder for fires) and that leave explosive deposits of metallic elements and oxides layered over the landscape.

See how this works?

Set up the fires at a profit and then make money fire-fighting, too.

Create the problem (and get paid by the Vatican) and then solve the problem and get paid by the victims, too.

And here we sit, paying for it all.
