

International Public Notice: Dear Mr. Trump

By Anna Von Reitz

We aren't fooled.

We know that you are up against it to try to justify your actions promoting the phony pandemic.

This is how we see it.

You had cause to know that the whole thing was evil, that it would cause disease, not prevent it; that it was not a "vaccine"; that the crap would pollute the whole human genome, pollute the blood supply of the world, kill and maim millions of innocent people ---- and what did you do, Mr. Trump? Operation Warp Speed? Spent \$10 Billion dollars to depopulate this America that you want to make healthy again?

After you helped so monumentally to destroy our health? Really?

Reeks of Hegelian Dialectic, don't you think?

Obviously, you realized your mistake and the need for some Top Drawer Window Dressing, someone with the credibility you so grossly lack on this issue of Public Concern: RFK, Jr., a man who the people do trust on this issue and will support in his efforts to clean up this dreadful industry and the horrific damage that you and your clubfooted First Administration have done to us, to our children, and the entire world.

Know that we are watching. Know that we will be protecting RFK, Jr. And know that you are not out of the woods just because you have included him in your Administration.

If you really want to impress us with your double-take you need to destroy the NIH and the CDC, utterly. Completely. And the FDA, too. You need to kill those corporations that have killed us, and do a good, solid, permanent job of it.

They need to be squashed like so many cockroaches in a Five-Star restaurant, and that's what it is going to take for us to take you and your Administration seriously on this issue.

Nominating a Fauci Wannabe of a different color won't cut it. Your decision to continue the NIH and the man you have nominated to head this Death Mill is an insult added to profound injury.

Your Nominee was and is a cheerleader for the Death Jab and the whole sick, ugly, disgusting, useless, self-important, fake-science, for-profit "medical" industrial complex. These organizations are not in the business of Health. They are in the business of Chronic Disease --- as the "health" statistics of this country prove, and if you think we are so stupid and so unobservant that we don't know that and see that, then bloody think again.

The proof is in the pudding, Mr. Trump.

The pudding says that there have been millions upon millions of innocent people who have died or contracted disease because of you, so don't expect to just waltz in, throw RFK, Jr. up as your storefront, and think that you are getting away with as much as a nanobot more of this crap, because you're not.

If you and Bill Gates and Keir Starmer want to find yourselves running around Piccadilly Circus like so many naked bulls pursued by mobs wielding hypodermic needles, just keep it up.

This is it, Mr. Trump, your notification of personal and commercial liability from the American People. You've used up all your Free Passes.

Take prompt, definitive, and effective action to correct your mistakes --- if "mistakes" they were --- and do your duty.

Dismantle and liquidate Pfizer, Johnson and Johnson, Moderna, Astrazeneca, and all other organizations involved in the production, distribution, advertising, sale, or transportation of all mRNA products of any kind whatsoever.

Dismantle and liquidate the so-called "National Institutes of Health", the so-called "Center for Disease Control", the DARPA patent holders, the hopelessly compromised and incompetent Food and Drug Administration, and all the individual laboratories associated with this horrifying debacle.

It's going to take more than lip-service and a storefront makeover.

You've killed our sons and daughters, our Mothers and our Fathers, in the name of profit, and now, you think you can turn on your smile and say, oh, I'm here to make America Healthy Again? After you destroyed our health?

Oh, come again, sir. Try passing another blood clot or wooden nickel, whichever you'd prefer.

We're not buying it. We're not satisfied. And we won't be satisfied until this entire horror is removed, root, stem, and leaf --- from the Pirbright Institute and Wellcome Trust to the Rhodes Foundation --- we wish for all of them to be liquidated, dead, and gone, as if they never were, their wealth given away to their victims.

The offending laboratories at University at Chapel Hill and Fort Detrick need to be razed to the ground, as memorials to the dead, with appropriate Public Recognition of why they are being destroyed.

Fine every hospital and doctor in this country that received kickbacks related to the pandemic, the whole amount of money they received for going along with the "pandemic", plus interest.

Dissolve the World Bank as a criminal organization involved in illegal gambling and racketeering, insurance fraud, sale of so-called pandemic bonds, and theft of depositor's assets. Tear it down.

The SERCO Employees at the USPTO need to be hauled out into the streets, chained together like the criminals they are, dressed in rainbow jumpers and hospital slippers. They all deserve this and a helluva lot more for rubber stamping thousands of criminal patents --- that is, patents for inventions and processes that are clearly criminal in nature and intent.

They and their clients who have applied for criminal patents should all be finger-printed and identified as the public enemies they are, and tried for their part in all this, which was to allow all these other criminals to profit from premeditated death and destruction and evil.

Like Anthony Fauci, who made millions doing this to innocent people. We want his liver. Make no mistake.

These "public servants" need to be whipped in public, or worse.

They need their faces plastered on every post office window from here to Louisiana and from New York to San Luis Obispo. Everyone needs to know and recognize who these feckless criminals are, because, Sir, they are your employees and we all know who you are.
