Dear Mr. Trump -- March 27, 2020

By Anna Von Reitz

SPV = "Special Purpose Vehicle" = "Public Transmitting Utility", etc., etc., etc.,

So, what the attached (FB Friends go to my website to see the document) run down shows is that the Exchange Stabilization Fund (a giant currency commodity rigging fund) is being used to buy a fictitious first position interest in other fictional entities.

http://annavonreitz.com/spvrundown.jpg

In this case, the Territorial Government is creating new fictitious "PERSONS" to convey the assets of other fictitious PERSONS belonging to the Municipal Government (our estates and public transmitting utilities) and offering to use our credit to do it; and all of this is fraud.

It was fraud in the beginning (1868) and in the middle (1933) and it is still fraud now (2020).

Obummer did this same schtick during the 2008-2009 bailout and Big Short on Wall Street. All those "Billing Statements" that used to come to "JOHN MICHAEL DOE" were converted by a similar process to the name "JOHN M DOE" and next, unless I am mistaken, they will attempt to roll that PERSON into a John M. Doe or JOHN DOE or some other variation of "fictional entity" to function as a "Special Purpose Vehicle" --- and all of it is fictional conveyance of language, that is, fraud.

It was fraud to impersonate Americans and create Cestui Que Vie Trusts named after them. It was fraud to use DOG LATIN to convey those Trusts. It is still fraud no matter what they do or say. And they are still trying to victimize the actual owners of the property to do this.

The actual gold, silver, land, and other assets owed to us, is staggering. The middlemen armed with nothing but hot air and lies are trying to intervene and cut a "priority creditor status" for themselves out of their own lies and fabric of their constructive fraud.

The actual asset accounts have been sealed and coded so that they cannot be opened except by the actual living man, Julius Divinagracia. Instead of expediting his access to the accounts and allowing him to do his job, the Mindless Ones have contrived to render him misidentified and helpless, while they do everything in their power to prevent the re-venue of the actual assets to the actual owners --- who are all living people. Not governments. Not institutions. Not corporations.

Mr. Trump's advisers are a bit slow on the uptake. They have been told that Julius Divinagracia has entered the jurisdiction of the States of the Union and is under the protection of The United States of America. He is fully empowered and set free of any possible claim of Municipal citizenship obligation. Or Territorial Citizenship obligations.

It's time for the Territorial Officers to assist in bringing forward the actual asset accounts, instead of playing stupid games aimed at cashiering those accounts to generate fictional credit for themselves.
This isn't about "gold" versus "credit" versus "stocks" versus "bonds" versus "cryptos". It isn't "United States Citizens" versus "U.S. Citizens" versus "citizens of the United States", either.

This is about basic ownership and rights to private and public property that has been purloined and abused, about incorporated "governmental services corporations" abusing their Employers in Breach of Trust, about generations of bankers and politicians and military officers acting in Gross Breach of Trust to defraud, impersonate, impoverish, enslave, and prey upon their own Employers, about the Pope playing a two-sided game of fraud and false pretenses and employing schemes to impersonate people and disrespect them as THINGS.

Dear Mr. Trump.... it's a sorry business at best. Don't make it worse.

No more "SPVs" being dreamed up by some schmuck in the Treasury Department, Department of Commerce, or DOT.

We have denounced the Scottish Interloper's role in 1868 and we denounce its attempts at a repeat performance now. You may not use our credit to buy yourselves an unearned interest in our assets or seek to replace us as the actual Parties of Interest owed all right, title and interest related to the Municipal Corporations that have been used as a fraudulent fictitious conveyance and bankrupted under conditions of fraud, too.

Notice to Agents is Notice to Principals, and Notice to Principals is Notice to Agents.

You all need to straight up and fly right and expedite the re-venue of our assets to us. Stop playing this criminal game of deceit and impersonation, identity theft, False Registrations, and color of law governance.

The cats are back. The rats have to go.

The boys in blue have been busted and that's all there is to it. Move on. Do the right thing. Remove the False Registrations and restore the proper owners to the possession and enjoyment of their own property, free and clear of all debt or encumbrance.

Do not offer to use our own credit to buy interests in our estates. Re-venue our estates to us. We are clicking our silver slippers together and saying, "There's no place like home."

The only Special Purpose Vehicle that needs to function is the Treasury Account for the United States of America 1789. It needs to transfer all associated assets including the valid credit assets back to The United States of America 1776 mercantile account, and from there, to disburse to the individual (former) franchise owners and their States of the Union. Not the Territorial States of States.

And, it's time to come clean and talk to the American States and People in terms of their political status choices. Everyone has the right to know and to choose. This should have been done in 1865. For God's sake, do it now.

We have the key to the asset accounts and we know exactly what went on here. Any attempts to lie to the American People or anyone else about the actual ownership and status of our accounts will only result in more acrimony and present-day accusations of fraud. Better to lay the blame on FDR than continue this corruption and have nobody to blame but yourself.
