

Dodecallion Times Fifty -- Open for Business

By Anna Von Reitz

Day before [yesterday](#), we broadsided the world by openly disclosing the history and source and nature of the asset funding underlying most of the world's banking system --- and answering the question who underwrites it all?

And, though this is no big surprise to anyone who pays attention, it isn't the insurance corporations and it isn't the banks that actually underwrite anything. It's privately owned physical assets that carry that load and which provide all the credit, too.

The current world economic system is provided by essentially one family, and only part of its resources are needed to do this. In addition to the assets deployed by the Avila Family Trust, there are over 5,000 other public and private trusts that individually or in combination can expand world resource asset bases to practical infinity.

That's what we are talking about when we talk about "Infinity Accounts".

Now you can all see why I am offended by self-interested corporations keeping your attention centered on a "National Debt" that doesn't actually exist, and taxing you and harassing and harming you, to pay interest on this non-existent "debt", too.

Why not focus on what you are owed back from this voracious crime syndicate instead?

And understand that the actual owners of all the assets underlying this whole system gave different instructions to the banks. The actual owners of the assets didn't create this situation.

It's the banks and certain foreign Principals, the Holy See, the British Monarchy, and the British Crown's Westminster Government, chiseling profits for themselves, that created all this senseless "debt" and suffering and created the IRS and all the other oppressive "taxation" schemes long ---- long ---- after there was any need for anyone to pay taxes of any kind.

And they are still trying to justify this and weasel around and use strong-arm tactics to retain "control" for themselves.

It's up to you, folks. What do you say? Do they get away with this?

Think about all the commercial corporations that have been used as their sock puppets, like the UNITED STATES and the USA, Inc. and CANADA?

These thugs have grossly abused the privilege of incorporation--- and have grossly abused their resulting bankruptcy protection at public expense--- and nobody has disciplined any of them for it.

The Popes, who are responsible under Ecclesiastical Law for liquidating bad corporations, have [sat](#) on their velvet tuffets and raked in illicit profits, instead.

The British Territorial United States Secretaries of State for the past 160 plus years have [sat](#) on their thumbs and played Numb and Dumb and allowed and promoted injustice-for-profit on a scale unimaginable, and the Queen and her Government and the Lord Mayor of the Inner City of London and the Government of Westminster, have all done the same and worse, while acting in Gross Breach of Trust and Commercial Service Contract.

Do you all, finally, understand what the IRS is? It's not anything connected with our American Government.

The IRS is a Subcontractor operating under oversight of the House Ways and Means Committee "Oversight Committee" of the British Territorial United States "Congress" ----- which is another Subcontractor of our Government, operating in Breach of Trust and Commercial Service Contract; the Internal Revenue Service is not a government agency of our Government at all, full stop.

The Internal Revenue Service is a private, for-profit organization operating as a Bill Collector and Privateer under Letters of Marque and Reprisal. And so is the Bar Association, which is registered as a Theater and Entertainment Company. They are engaged in illegal racketeering based on imaginary debts and false claims of indebtedness.

If that doesn't make you angry, what does it take? A habenero up your butt? Everything they have done is white collar crime and fraud, and just because it has been going on since 1865 doesn't make it any better or different. There's no "statute of limitations" on this one, boys.

Now these Guilty Parties are circling the wagons and proposing one of two options: (1) using the military that we pay for against us, which they have myopically begun, or (2) stealing private assets belonging to Demetrius Julius Shiva's Avila Family Trust and the purloined assets of 5,000-plus other private trusts to set themselves up as Trustees for the World.

Vomit now, please.

Oh, and they are proposing that the Puppets-at-Large will be chosen by "merit" --- a subject that these yahoos know nothing about.

In 1991, the Avila Family Trust precious metals holdings (just that one trust) was worth three dodecallion--- that's a three followed by 41 zeros. **Today**, it is worth 3 followed by, roughly, 205 zeroes, not counting interest.

That is all money that is supposed to be supporting you, to lift tax burdens off your shoulders, to pay for your education, to provide good food, clean water, medical care, jobs, business opportunities, anything and everything that you need to have secure, healthy, happy lives!

Instead, what have you got? War, disease, drugs, electric cars, thugs and perverts in charge.

The only thing these so-called leaders are good at is causing trouble and doing stupid things on a large scale.

We are opening up the automated online facilities for people all over this planet to declare their position and in effect, vote, on these matters.

Come home to the land and soil of your respective countries and live in the abundance and peace that the actual donors and fiduciaries have always wanted for you, or stay "at sea" under the boot of the British Territorial Raj. It's your choice under international and global law.

<https://globalfamilygroup.com/lrps.html>

The banks in receipt of the gold and other precious metals deposits owe 4% per annum tax free and they haven't begun to make payments on that.

We are taking these banks over as the major stockholders, not proxies. We are beginning The Push to put the Usurpers in their place and the corporations they have employed for criminal purposes into liquidation.

The World Bank additionally owes an accounting on the credit accruals generated by the ASBLP accounts, which in turn depend on Avila Family Trust assets being traded for over fifty years.

We are the actual owners and Fiduciaries and donors, so when we tell HSBC to cough it up, and go to the Vatican Chancery Court and bang our dish on the floor, it's time for everyone to listen up, including SERCO, INC., the Paymaster for the "United States" Military.

This is the actual American Government talking to you and this is the Fiduciary for the living people who own those "abandoned" assets--- that are not abandoned.

And for all those parties listening in on this conversation, get a clue---your rumps are in the wringer, too, whether you work for the corporations doing the dirty work or not.

Is a job that requires you to lie, cheat, rob, and murder so precious, when its keeping you from having a life of peace and abundance right along with everyone else?

Every government employee from the Post Office to the jails, from the County Sheriffs to the Commissioners, every Public Employee everywhere, every employee of every incorporated business everywhere, it's your lives and the quality of your lives at stake just as much as everyone else's.

This really is a no-brainer.

When you make your choice and decide to fly the peace flag on the land and soil of your own country, you open the doors to a better life for everyone. You bypass the whole criminal, ugly, coercive matrix that has been built up around you. You inherit your part of the wealth and benefit that has been stored up for you. You get a bank account and a bank card in a totally new independent banking system, one that doesn't depend on Swift or BRICS or the paradigms of the past.

You, Joe Average, get to trade in credit, not debt.

It will take a little while for all the connections to be made and the pre-paid credit cards issued and everything else that has to be done, but you can literally choose a much, much brighter future for yourselves. Do so [today](#) and spread the word.

Attach copies of the International Public Notice issued on the [22nd of February 2023](#) to this invitation and hand it out to friends, family, neighbors, local politicians, "federal" officials, military personnel, bankers and lawyers.

Anna Maria Riezinger, Fiduciary

The United States of America
