

International Public Notice: Egregious Harm

By Anna Von Reitz

We have reviewed the various ways and means by which "our" government has been usurped upon by Federal Employees operating in Breach of Trust and Contract. Both the British Territorial U.S. Citizens and the Roman Municipal citizens of the United States (Civil Service) have colluded against their employers, the State Citizens of this country--- directly--- since 1937.

The roots of this situation go back over 300 years and span continents. These crimes against us and our government are almost coincidental in that the same crimes have been applied to many other countries, too. While we have been misused and abused as unknowing cheap mercenaries, and other people have been our victims, the actual criminal masterminds, banks and corrupt military officers and corrupt politicians, have consistently evaded detection and punishment.

Crimes of personage and barratry have been central to the success of this scheme which has aimed at the establishment of a new and terrible form of government: Corporate Feudalism, in which faceless, soulless and largely unaccountable corporations would rule over living men, and for their own pleasure and profit, turn our lives into living hell.

This requires us to dissolve the corporations responsible for all this malfeasance and requires us to punish the men responsible for the existence of corporations which have been allowed to wage war for profit, governments which have supported this, and CEOs who have acted as undeclared privateers against the interests of their customers and employers.

These white collar criminals are criminals nonetheless, and their crimes have resulted in murder, mayhem, theft and misery on a scale that is unimaginable.

Over the next several months you will witness governments and government structures being defunded, debanked, exposed, individual politicians arrested, and almost incomprehensible reorganization and restructuring of government functions. The size of government and the range of its activities will be greatly reduced and the grossly bloated government budgets trimmed and disciplined.

This will take place in tandem with mammoth expansion of oil resource development and mining for Rare Earth Minerals. There will also be a big push to gain control over vital commodities that in fact belong to everyone --- water, air, and land, especially agricultural land, because these immoral men seek to use food and water as weapons of coercion.

It's time for the rest of us to turn the tables and not be deceived any longer about any of this. These corporations are not our governments and their leaders are not our Heads of State.

We are not their debtors; they are our debtors, instead.

The egregious harm that they have done to the Earth and to all of us, must be addressed.

In the months to come, many welcome acts of abatement will come. Illegal taxes will be removed, illegal mortgages, too. Many of the most terrible scourges of these corporate regimes will be removed altogether, or extensively redefined and limited. We may say good-bye to the misnamed "Department of Justice" and the "Internal Revenue Service" and the State-level "Child Services" predators.

All this is most welcome, but we keep our eyes on the prize. The illegal occupation of our country by usurping foreign business interests has to end. Commodity rigging and monopoly interests have to be suppressed and

recognized for what they are: criminal obstructions to free trade. Likewise, the banking and court systems have to be completely overhauled and reformed.

Agencies like FEMA, must be redefined and serve the public good, or be disbanded.

Not one in a million Americans knows that FEMA's actual job is "Continuance of Government" meaning the Roman Municipal Government --- not continuance of the people paying for that government, nor any kind of disaster relief. The secrecy and self-serving purposes of these organizations must be exposed and appropriate steps taken to put an end to confusion about the nature of these agencies, their purpose, and who or what benefits from them.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents.
