

Emergency Powers?

By Anna Von Reitz

It should be perfectly obvious that our Constitution has never granted any so-called "Emergency Powers" to our President nor to any Congress authorized to act in our behalf. Logically, a Congress can't give what it doesn't have --which is the power to declare any "Emergency" nor to create the existence of any "Emergency Powers" on our behalf.

Any such powers claimed by the Municipal United States Congress apply only to its organization with respect to its administration of the Washington DC Municipality, which it rules as an independent international city-state. See Article I, Section 8, Clause 17.

Out of two million "attorneys" we don't have one left that can read a simple contract verbatim?

America as a country was born in an "emergency" and forged in fire. We don't even describe any "emergency powers" as we simply exercise whatever powers we need to exercise whenever and however.

Witness my comments to President Trump yesterday. While he is wondering how he can protect America's borders and do his job without funding, I just flat-out told him. Go ahead and declare your Territorial Emergency ---- and coordinate with us, your actual Employers running the land jurisdiction government owed to this country.

We're back. We're "home again". We have the lawful authority to deputize every man in Texas, New Mexico, Arizona, and California if we want to, and we can authorize them to pack up their 30.30's and go make the Mexicans and Hondurans an offer they can't refuse.

The Territorial and Municipal United States Governments are milling around like chickens with their heads off, squawking and squealing about the Border Crisis, the Border Crisis, the Border Crisis and the Wall, the Wall, the Wall. But the reality is that we can have a million armed men on that border and backing up the Border Patrol as sworn deputies in 24 hours. And we don't need any "Emergency Powers" to do it, either.

Mr. Trump is justly concerned because it is his job and his business to provide for the safety and security of this country and its people. He has limited forces and funding to do it and 20,000 Meso Americans wanting to illegally cross our border is a real threat. To him. Not to us. We can squelch that nonsense like a mosquito running into a very big fly-swatter.

The Municipal Hacks aren't at all concerned because they don't represent us, they simply took it upon themselves to claim (falsely) that they have the right to spend our money and enslave us to pay their bills when they demonstrably and definitely don't. In fact, all those clueless numb nutz in the Municipal Congress need to be permanently ceasing and desisting any claim to represent these States and this country---- because they don't and never have since 1860.

It's been nothing but a gigantic fraud scheme for 150 years, and thank the Lord there is no statute of limitations on fraud.

The Municipal "Congress" has managed to mess things up so completely that their corporation has required both bankruptcy and liquidation and for ninety days they can't pass a new spending bill, so even if they wanted to, they couldn't give Trump money for a Wall.

And they have no business making claims upon us and spending our money any way.

They are committing blatant international fraud. They don't represent us. They are not our fiduciary or fiscal agents. They are running their own separate "independent, international city-state" and most of the Democrats are Dual Citizens of Israel. All they are doing is picking our pockets in broad daylight and the worthless Papal Administration has been sitting there as our "Trustees" getting kick backs and letting them do it for 150 years.

Just because they hold their private corporate elections in every state of the Union doesn't mean those are our elections. Just because they open up their "franchises" like Dairy Queen franchises in every state of the Union and call them "STATE OF....." doesn't mean these are our States.

Trump could spend existing allocations in the Defense Budget to build the wall or beef up border security in other ways--- and he should. That's our money however it was illegally and immorally and fraudulently fleeced from us and one of the duties of the Territorial United States Government is to defend us. We didn't give it to them to defend the members of the the treasonous Municipal Government or the Hondurans, did we?

No. Nobody in their right mind could defend any such assumption.

We have our "Emergency Powers" and they don't need any declarations, legal interpretations or explanations. Cross our borders and leave Mr. Trump unable to defend, and we will defend ourselves. There isn't anyone anywhere who has one iota of an excuse to say anything about it.

The Pope needs to get off his duff and arrange an airlift for all the members of the Municipal Congress that still want to play this game. Looks like most of the Democrats will be finding new homes in Israel. Maybe a few decades of hard work on a Kibbutz will do them some good.
