

International Public Notice: End the Madness

By Anna Von Reitz

It should not be necessary for us or anyone else to say this, but expecting parents to put 200 vaccines into the bodies of their babies and small children is madness.

<https://needtoknow.news/2024/12/cdc-rolls-out-200-routine-vaccines-for-2025-compare-to-7-injections-for-children-in-1983-zero-for-adults/>

It's time to take the employees of the CDC out into the street and publicly inject each and every one of them with all 200 vaccines that they are mandating for our school children.

We guarantee that the problem of unaccountable agency recommendations foisted off as public law will end abruptly and never surface again.

Consider this a demand for performance from the actual government of this country to all government officials and all public employees and all military officers.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents.

Prompt action is required.

<https://rumble.com/v5ze10k-bill-gates-admits-disease-x-is-elites-final-solution-for-a-new-world-order.html>

The so-called custodians are not our custodians. They are outlaws pretending to be public officials and caretakers, parasitic and predatory non-entities breaking Universal Law and attempting to coerce people into harming their own children.

A public demonstration of justice is required.

When we see the lifeless bodies of the CDC officials who have made these recommendations punctured with 200 hypodermic needles and bloated with their own immune system reactions, we will feel that justice has been done.

This does not require any lengthy court battle or legal determination; the threat to the life and well-being of our children veiled as a "protective health measure" is self-evident.

All this takes is a three-man tribunal of military officers.

Let those responsible taste the fate they have meted out to others.

Until then, be aware that we do not accept the offer, and will happily shove needles into anyone making such an offer.
