

Evil Peas and Carrots

By Anna Von Reitz

Forrest Gump always talks about him and his childhood friend (and later, wife) getting along like "peas and carrots" and everyone knows what he means. Some things just naturally go together.

It's the same way with corporations and central banks and illegal mercenary operations.

It will come as a shock to many that central banks are a relatively recent invention, having come into existence shortly before the American Revolution. It will come as a further shock that the real purpose of central banks is to control the price and availability of commodities--including money as a commodity.

If you will think for a moment, you will realize that this is commodity rigging ----and commodity rigging is illegal.

They only get away with it, because the self-interested commercial corporations masquerading as our government have allowed it.

Mercenary conflicts are illegal, too.

The entire "war" that our military subcontractors have waged against our federal civil service subcontractors has been staged by both parties, and it has been cynically used as an excuse for the way these corporations have defrauded all of us and plundered our country for six generations.

We have direct proof of the collusion of these "governmental services corporations" in this scheme to defraud and plunder since 1937 and that proof has been distributed all over the world: "The Declaration of Interdependence of the Governments in The United States".

We have the names, signatures, dates, and times.... so, what else is necessary for their scheme to work? Corporations.

Corporations provide protection for the personal fortunes of the schemers and a lack of accountability for debt (via the privilege of bankruptcy paid for by the public) and a lack of accountability overall.

If people were facing jail time and loss of their personal fortunes, they wouldn't be doing any of this. There'd be no point. They couldn't profit from central banks and wars for profit without corporations to protect them and their ill-gotten gains.

While trusts have existed since the Crusades, all the other forms of corporation are of recent vintage, starting to proliferate at about the same time as the central banks--- for now-obvious reasons.

All these B-Corps, S-Corps, C-Corps, NGO's, Non-Profits, Cooperatives, Foundations, LLCs, PLs, etc., have sprouted up within the last 200 years, and all these "business models" have been created by the Roman Curia, which remains responsible for their administration.

Under Ecclesiastical Law, which is the highest form of public law in the western world, the Pope has the right and the duty to liquidate any corporation that engages in unlawful activities.

These provisions are built into the agreements that allow all these corporations to exist and which provide all these protections for corporations at public expense.

So we have a Trifecta of Criminality working together and things have gotten so bad that we have madmen like Bill Gates and Klaus Schwab building Surveillance and Control States, proposing to own the people of the world as Genetically Modified Organisms, and claiming the right to kill their "property" at will.

This has to stop and this has to be punished.

We are, therefore, bringing specific action to force the liquidation of all these war-mongering corporations and punishment of the men who have so grotesquely misdirected their operations.

Join us. Everyone in the world has a stake in this action. We have created a way to exit from the evil system for everyone worldwide. It includes a new banking system based on credit instead of debt.

We have also created the means -- and it is well underway -- for Americans to reclaim the control of their country and their courts:
