

The Evils of the Agencies

By Anna Von Reitz

Those who have followed me for years know that the Principals who contracted with our States of the Union to create the three Federal Constitutions palmed off their responsibilities onto hireling organizations soon after the Civil War hostilities ended. Within a couple decades, these hireling subcontractors began hiring other subcontractors to do their jobs for them. They called these "subcontractors of subcontractors" by a new name---- "Agencies".

Okay, so our contract is with the British Monarch. The British Monarch hires a Scottish Commercial Corporation doing business as "The United States of America --- Incorporated" to do the work delegated to the British Territorial United States under The Constitution of the United States of America. That deceitfully named commercial contractor promptly gets into trouble, and finds that it needs a substantial in-house legal firm to protect it from damage claims, so they create a new subcontractor, "The Department of Justice", and they appoint and hire all sorts of employees and they contract with a number of vendors to provide services to this new subcontractor of a subcontractor and they call it an "Agency".

We, the People, doing business as The United States of America, our unincorporated Federation of States, have a contract with the British Monarch.

The British Monarch hires a Scottish Corporation incorporated in Scotland but named after us and doing business as The United States of America, Incorporated, to do the work that the British Monarch is supposed to do.

The United States of America, Incorporated, creates a new "department", which is another incorporated entity doing business as the Department of Justice, Incorporated.

We are now three tiers down and we note that: (1) the Department of Justice, Inc. is a foreign corporation; (2) it works for the Scottish commercial corporation doing business

as the United States of America, Inc., and (3) it's called an "Agency" and (4) it is separated from us so as to make it unaccountable to us.

- (1) The United States of America (Unincorporated) - British Monarch
- (2) British Monarch - the United States of America (Incorporated)
- (3) the United States of America, Inc. - the Department of Justice, Inc.

We also note that this Agency is created/hired by and accountable to the Scottish corporation doing business as "the United States of America, Incorporated" --- not to the British Monarch and not to us, even though it is being paid for with our money.

This Department of Justice is being paid for with our money, and its job is to defend the erstwhile Scottish Commercial Corporation (and its Successors) against our complaints.

Talk about shooting yourself in the foot?

And the Scottish Commercial Corporation (and its Successors) isn't accountable to us, it is accountable to the British Monarch --- who under the terms of the Constitutional contracts is accountable to us.

In real life, read that as the British Monarch ignores their obligations and thumbs their nose at the American States, reaps the profit from the mercenary Scottish Commercial Corporation, bankrupts it (or its Successors) periodically, and offloads the debts onto the clueless, trusting Americans.

And if the Americans complain, bring complaints, or charge fees in return, the "Department of Justice" is there to protect the Middleman Commercial Corporation, at our expense.

So far, we've just been describing the Territorial "Agencies" disguised as government departments.

The DOJ, FEMA, IRS, BLM, and so on, are all additional Municipal Corporations that serve exactly the same function for the Municipal Government.

They are all "Agencies" --- employees of employees of employees that don't recognize their actual endline employers at all, and who bear no direct accountability to us at all.

Now, several years ago, I told everyone that the Parasites are planning to move to China and begin eating out their new Chinese Hosts --- did I not? And this past week what happened? Goldman-Sachs, the Internal Revenue Service, and the Federal Reserve, all moved to China.

I also told you that the Municipal Government was arming their "Agencies" as Mercenaries to fight on our soil. This is completely outrageous and illegal, but here they are:

This is especially egregious because the Pope owns both sides of the purported conflict. There is no doubt that Pope Francis has been involved up to his skull cap in planning a completely bogus mercenary war to take place on our shores, and he is, unavoidably then, both a war-monger and a war criminal for allowing his corporations and Agencies to operate in any such way on our soil.

This is especially true as our States of the Union have declared Peace and published our Peace Treaty and International Peace Proclamation.

The Pope may have authority to authorize war within the District of Columbia and by God, he'd better make sure that he keeps it in the District of Columbia.
