

The Facts of Life

By Anna Von Reitz

The criminals responsible for creating and running the banking system have been given over thirty (30) years Notice to correct their operations. Three decades. A whole generation.

For the past two decades, they have been under Due Process and Commercial Lien.

Instead of correcting anything they have doubled down and right now, they are trying to pull off yet another diabolical fraud scheme designed to save themselves and cheat the American States and People and everyone else on this planet.

They hope to do exactly what they want to do --- at our expense, again.

I am openly, unequivocally, without the least little bit of apology, calling for the worldwide arrest and prosecution of the bankers responsible for this. That such a self-serving answer is even on the table is offense enough.

I am calling for their arrest, the confiscation of their assets, the repatriation of the land titles owed to the States and people of this country and to all the other countries harmed by these criminals.

These criminals are responsible for the Civil War, the First World War, the Great Depression, the Second World War, Korea, Vietnam, Iraq 1 and 2 and, even as we speak, they are still screwing around trying to get World War III started.

They've killed millions of innocent people for profit.

They are criminals on such a massive scale that people are still trying to wrap their heads around the facts but, at the end of the day, the facts of life are simple. They are criminals. Arrest them.

Now I have had some Weeping Nellies trying to mischaracterize my statements and suggest that I am advocating some kind of political controversy and "start a Civil War" by suggesting that these criminals may need to be gunned down in the streets ----- but it's not because they are Republicans or Democrats--it's because they are criminals and they are unrepentant criminals.

They may need to be forcefully removed.

These are not nice men. They have gotten away with crime for generations. They think they have a right to get away with crime. Even when it is brought forcefully to their attention, they continue on as if nothing had happened, as if crime were the normal course of business and as if we all have to stand here and put up with it.

But we don't. Not really.

And we don't have to go to war or wait for another election, either.

All that needs to happen is for these bankers to be arrested, their assets confiscated, all their false commercial claims repudiated for the frauds that they are, and all their diabolical plans upended.

This is a matter of crime, not politics.

Iceland woke up, realized the facts of life, and cleaned house.

It's time that we all did the same.
