

Fatal Lies

By Anna Von Reitz

The first Fatal Lie is that there are too many people on Earth.

The opposite is true.

ALL developed countries on Earth are failing to reproduce their own population. And it has been this way for decades.

The only countries that are growing in population are undeveloped Third World countries where women are oppressed and uneducated.

And they are not making up for the population lost.

We are facing a population collapse.

And the idiot Eugenists are trying to kill most of what's left.

Listen up:

<https://www.youtube.com/watch?v=GcA3rI19jYM>

The second Fatal Lie is that the climate is warming.

It has been cooling for decades and still is.

Anyone who bothers to look can see this.

Anyone who knows about Solar Minimums can predict this.

Uh-duh.

The third Fatal Lie is that carbon dioxide emissions are the problem.

Lack of oxygen is the problem.

Lack of oxygen is what is breaking up the natural carbon cycle.

And causing the build up of dissociated carbon dioxide.

We've lost 5% of the atmospheric oxygen in the past hundred years.

Because we've cut down forests and polluted the oceans.

Lack of oxygen is also causing serious health problems due to incomplete oxidation of food and oxidative stress.

All these Fatal Lies have been adopted and spread by the Club of Rome.

All these Fatal Lies have been fostered and supported by the Vatican.

All these Fatal Lies have been accepted by the Nobel Committee, various governments, and politicized University Think Tanks that are paid not to think.

And despite having plenty of reports otherwise, the United Nations has done nothing to oppose this nonsense.

Wake up while there is still something and someone to save.
