

The Flat Out

By Anna Von Reitz

There are two things called “United States of America”.

There is our American Federation of States.

And there is a British-controlled Territorial (Commonwealth) corporation in the business of providing governmental services- which is a subcontractor of the American Federation of States referenced above.

The key to this is the word “the”.

The word “the” is made part of the name of our unincorporated Federation of States:

The United States of America.

The foreign corporation doing business in our name is “the” United States of America.

It exercises certain delegated powers for us, which is why it is allowed to operate under our name as “the” United States of America.

It’s not us. We are not them.

They work for us under a contract known as: The Constitution of the United States of America which was signed in 1789. This contract lays out the duties and “powers” and limitations of our Federal Subcontractors.

All the powers ever delegated to the foreign British-controlled corporation doing business in our names as “the” United States of America” were delegated to it by us, The United States of America.

We are the ones who ultimately own and ultimately control (and pay for) all of it.

The United States of America.

Now that you know and can see the difference between The United States of America and “the” United States of America, you can also see that it is The United States of America that is the owner, controller, and employer.

Unfortunately, the Middlemen running the United States of America (the British corporation) have run amok and so have the middlemen running the Municipal subcontractors.

As a result we have multiple crazy “misunderstandings” to clean up.

For example, the FBI, which is a subcontractor of one of our subcontractors — both of which take their paychecks from our pockets, think that it is their job to investigate us, the actual American Government— at our expense.

What needs to happen is that people all over this country need to wake up and remember who is who and what is what, who pays for what, and who pays who.

This goes for the Federal and State-of-State Employees and for Americans at Large. We all have our parts to play and responsibilities to perform.

The United States of America — our unincorporated Federation — is doing its job. It’s high time for all our foreign subcontractors to stop jerking around and do theirs.
