

My Slogan--- Keep Calm and Get Even

By Anna Von Reitz

My Slogan---- "Keep Calm and Get Even"

During WWII King George V made a famous short speech in which he urged the British people to "Keep Calm and Carry On".

Today, I am urging Americans to "Keep Calm and Get Even".

It's true that your own employees have self-interestedly defrauded you.
It's true that your international Trustees have acted in gross breach of trust.

It's all ugly, it's all true--- and it's beginning to hit home. Despite the best efforts of paid trolls and True Believer members of the American Bar Association, the Truth will out.

Millions of Americans are beginning to notice things they never noticed before and beginning to understand what has happened to their country-----and now, they are beginning to understand why.

Ninety percent of it is simply that we have been left in the dark, mischaracterized, misrepresented, and trustingly asleep at the wheel.
So now we are waking up by the millions and it is not a pretty story.

Our country is neglected, in shambles, saddled down with Odious Debt, blamed for this circumstance by the very same people who are responsible for creating this mess in the first place.

Let's place the blame where it belongs--- on the Popes who betrayed our trust between 1868 and 2008, and subject to performance, maybe even now.

On the British Monarchs who have waged commercial war against us despite their actual and factual obligation to protect us on the High Seas and Navigable Inland Waterways.

On the politicians lusting after money and oppressive power to coerce.

On the British Subjects living here among us --- most especially the members of the Bar Associations--- who have acted as Undeclared Foreign Agents while under contract to provide us with "essential government services". And on ourselves, for not paying attention to what these vermin were actually secretively doing and saying and claiming about us.

They hope and expect us to react in violent anger. They want an excuse to "come down hard" and open our borders to UN intervention. They want to kill off millions of their creditors and hope that the rest of us remain stupid, dumbed-down, unable to operate against them and their schemes.

But it's not going to go that way, because you are all clued in now. And you are going to pass the word: Keep Calm and Get Even.
