

International Public Notice: The Fungible Nature of Gold and Empire

By Anna Von Reitz

In 1934 Britain defaulted on its World War I debt to the Americans, who, in the depths of the Great Depression, were forced to take desperate measures such as the Emergency Securities Act and the Emergency Banking Act.

These Acts resulted in the corporate United States hegemony "securitizing" the labor of its own citizens as an asset --enslaving those who worked for the Federal Government's Civil Service and subjecting the military to press-ganging and peonage. It also resulted in FDR's famous house-to-house search for privately owned gold and the outlawing of private gold ownership.

After the Great Depression eased, the US Corporation continued these practices of securitizing labor and extending them via various means of entrapping average Americans and placing ownership claims on their private assets to be used as collateral for public debts.

As another aspect of this, Federal Reserve Notes were forced upon the American Public via unlawful Legal Tender Laws, and an arbitrary one-to-one Exchange Rate was established, declaring that one Federal Reserve Note was equivalent to one United States Silver Dollar --- for government purposes, of course.

This resulted in millions of Americans having to give up their silver currency in inequitable exchange for paper promises to pay "sometime" in the future; exactly what we were to be repaid with or when was never settled. The

"good faith and credit" of the British Territorial U.S. Congress was supposed to be sufficient to back this unsecured loan of our goods and services.

The complex and highly unlawful and illegal practice of latching onto American babies and registering them as British Territorial U.S. Citizens began in earnest with the passage of the Sheppard-Towner Act in the 1920's --- just in time to secure a population of purported twenty-something "British Territorial Subjects" in America, who could be legally subjected to the draft and the infamous Buck Act of 1940.

At first, this "padding" of the Federal citizenry rolls only applied to orphans and other actual Wards of the State, but it was so highly profitable to seize upon the assets of the living people that the for-profit government services corporations were highly incentivized to concoct more means to invoke ownership claims via registration, enrollment, induction, and enfranchisement of new "Federal citizens".

These evils were kicked off by British debt defaults from the First World War, but the British had already caused another whole set of debts and problems for the Americans via the bankruptcy of the Scottish Commercial Corporation they booted up in 1868 and called "The United States of America" -- Incorporated.

This Scottish Corporation seized upon the assets of the Americans living in the eleven Southern Confederate States (which are business enterprises doing business as "states of states"), including their gold, as "war reparations and repayments" following the Mercenary Conflict they mischaracterized as The American Civil War.

They created the entire Fourteenth Amendment "Federal Citizenship" Scheme and set up the quasi-Administrative Court System as a means to extract these payments from the Municipal Civil Service workers, former black plantation slaves, and whoever else they could beguile, misidentify, or charge as a "rebel" or a Ward of the State.

This is what turned the Administrative Courts into de facto Collection Agencies for the government corporations that were always foreign Subcontractors on our shores.

We've had the British Crown Commercial Corporations and the Holy Roman Empire's Municipal Corporations, both, bleeding us dry under False Pretenses ever since.

It was during this time that a preponderance of American and importantly, American-Spanish gold was taken offshore for "safekeeping" by the British-controlled United States Navy.

Though this gold was never identified as a "debt" owed to Britain, these gold resources were nonetheless seized upon by the British and most of it was melted down and re-Hallmarked in Indonesia as British gold before being removed to permanent storage in the Philippines and Bank of England.

All this was taking place in the years just prior to World War I, as the British Crown prepared to bankrupt the Scottish Imposter calling itself The United States of America --- Incorporated, in 1906.

These American assets were thus claimed as British gold by the Bank of England to ensure that they were not included in the bankruptcy and the British were able to maintain the assets on their balance sheets as "trust property" owned and controlled by them "for" the unknown American owners -- our actual States and people.

This is when we, Americans, became "Foreign Sovereigns" and the whole oxymoronic conundrum of "Sovereign Citizens" began.

On one hand, the Bank of England was taking care of the American gold as a Trustee and had to admit that these were foreign trust assets belonging to who? "Missing" American Foreign Sovereigns presumed to exist.

At the same time, confused Americans were waking up and complaining about being press-ganged and conscripted by British Crown corporations --- so they claimed to be "sovereign" and the British claimed they were

"citizens" based on the undisclosed registrations of the American babies as U.S. Citizens.

Although they never had any right or reason to seize upon our gold as any war reparations owed by the Southern States-of-States were not attributable to the actual States and people of this country to whom the gold belonged, the Brits nonetheless contrived to latch onto and use our gold as collateral under their management.

Similarly, they never had any right or reason to latch onto our people and make false and self-interested claims against their individual Good Names and assets --- and promote the unlawful and undisclosed conversion of Americans to the political status of British Territorial Subjects.

These activities enabled them to continue their warmongering and pernicious Empire building as they could invest our assets, build the trust collateral, and use this to finance their ongoing investments in such activities as the Raj in India and the corporate South African government under Cecil Rhodes. They could also "legally" conscript our people as their citizens.

This explains how the British, who defaulted on their World War I debts in 1934, nonetheless had millions of pounds of gold to spend on World War II, just six years later, as described in this handy-dandy video presentation:

<https://youtu.be/boOPyGBLfv4?si=6pkb73EacMQwMrGU>

They weren't paying us British gold as part of the Cash and Carry program; they were repatriating American gold that was already owed to us and -- don't forget -- receiving goods and services equal to the value of the gold from us.

So we were paying them for our own purloined gold. Churchill paid his war debts using our gold to "buy" our resources.

Franklin Delano Roosevelt, a supreme Anglophile, knew this and joked about it. He also bragged about going house to house and seizing gold watches and wedding rings and collecting 20,000 tons of gold, which he then "reinvested",

giving 6,000 tons to the Federal Reserve, and the balance to the World Bank and IBRD.

It's time for a reckoning and so, as the American Administration of the British Crown Corporation now operating as the United States of America, LLC, threatens to audit the contents of Fort Knox, there has to be an explanation of how British Hallmarked gold is showing up in our banks.

Now you have the rest of the story. We paid for it all twice -- once as we collected the gold in the first place, and second, when we allowed the Brits to trade back our own gold for goods and services.

In the video presented herein the supposition is made that Fort Knox is full of British Hallmarked gold bars, and the truncated history of this is being offered as the explanation; but, what if there is no gold in Fort Knox, British Hallmarked or otherwise?

We can only say that there certainly should be plenty of American gold stashed in Fort Knox--- and elsewhere; and, if there isn't, there will be hell to pay--- and this time, the action will be against the actual Perpetrators who have engineered all this deceit, war, and mayhem for their own unjust enrichment.

The Bad Faith of the British Government has recently been highlighted by their backdoor 100 year agreement with Ukraine and their presumption that they could entice the British Crown Corporation operating as the United States of America, LLC, to take the bait and agree to British control of the Rare Earth Minerals that we would be left fighting for and paying for via the cost of conducting a long term war of attrition with Russia.

<https://www.msn.com/en-us/news/world/what-has-the-uk-promised-ukraine-in-starmer-s-100-year-deal/ar-AA1xnE1R>

Pay attention and realize that Britain is leveraging all its promises to Ukraine on the backs of its Allies and Confederates in the European Union.

Also note that while Starmer is saying the equivalent of "There, there...." to Zelensky, our truth varies significantly from the British Labour Party's version of reality.

In our view, the War in Ukraine should never have happened, and wouldn't have happened except for criminal activities of NATO members in Ukraine --- including our own criminally misdirected DOD.

In our view, Britain has been stirring the pot again, trying to get World War III ginned up, for its own benefit -- and once again, we have been tagged as the ones to pay for it.

In our view, thanks to the Biden Administration, we've already lost \$350 Billion dollars down that rat-hole and a significant portion of that money found its way back into the pockets of the Democrats and their Pet Pigs like George Soros, who openly admits his hatred for this country.

In our view, Trump was trying to work out a solution, both to our wasted money and Ukraine's precarious position -- one that would benefit both nations and bring an end to the carnage that Britain so obviously desires to continue.

Nothing has changed.

For the past 300 years, British Mercantile Interests have been the bane of the entire world. And they still are.
