

Graphic Organization and Update

Paul,

I am sending you a four-page text only presentation (Paul Snover will do a much better version down the road) of the way our federal government structure was undermined and reconstructed in Breach of Trust following the Civil War--- resulting in all the damage and chicanery ever afterward.

It's very quick study --- three charted pages, one page explanation.

Please especially note The United States of America (Unincorporated) -- that is our still-viable National Trust and Ship of State, which we are invoking to reclaim our assets from the federal corporation bankruptcies.

If you could, please post it on the page where people will see it upfront?
