

International Public Notice: Hey, Elon!

By Anna Von Reitz

While you are desperately trying to cut enough fat out of the UNITED STATES Corporation bankruptcy --- remember that there are two ways to make money in this situation --- you can save it, as you are trying to do, or you can recoup it.

There's more to recoup than there is to save.

Remember, too, that all physical assets belong to living people. All the gold and silver in all the Central Bank vaults came from private sources --- and we have the provenance and the proof needed to recoup all those assets that belong to Americans.

Turns out that quite a lot of the world's physical assets, especially bank assets, belong to Americans. We'll be happy to give a one percent honorarium to the Trump Administration for its assistance auditing and re-securing the off - ledger Master Account assets that belong to us.

One percent may not sound like a whole lot, but when you consider the immensity of the value locked up in those accounts --- accounts that can't be accessed without our help --- it's a more than fair proposition.

Please arrange to have a couple of your Auditors sit down with us for an afternoon.

All you can do is cut, cut, cut. We can bring the bread and meat back home, where it belongs.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents.
