

# The Final Poo-Poo on "Human Caused Climate Change" is Here

By Anna Von Reitz

I am just going to repost this entire article so that everyone gets it dirty and straight and has no doubt in their minds: (1) a single volcano dumps out enough carbon dioxide in a day to undo all our pesky human "green efforts" to control carbon dioxide emissions for a solid year; (2) carbon dioxide is necessary to life on Earth and neither we nor the plants can live without it; (3) the entire "human caused climate change" lie is just that --- yet another effort by our neighbors at the Vatican to find an excuse to guilt everyone and come up with yet another excuse to tax everyone.

Just say, "No." And no, and no, and no, no, no, no, and furthermore, hell, no, and no, again.

And God bless Nancy Reagan; she gave us the best advice ever heard from the White House.

---

Ian Rutherford Plimer is an Australian geologist, professor emeritus of earth sciences at the University of Melbourne, professor of mining geology at the University of Adelaide, and the director of multiple mineral exploration and mining companies. He has published 130 scientific papers, six books and edited the Encyclopedia of Geology. Sounds pretty learned/credible, don't you think? These are his extensive credentials:

<b>Born</b>	12 February 1946
<b>Residence</b>	Australia
<b>Nationality</b>	Australian
<b>Fields</b>	Earth Science, Geology, Mining Engineering

	University of New England,
	University of Newcastle,
<b>Institutions</b>	University of Melbourne,
	University of Adelaide
	University of New South Wales,
<b>Alma mater</b>	Macquarie University
	<i>The pipe deposits of tungsten-</i>
<b>Thesis</b>	<i>molybdenum-bismuth in eastern</i>
	<i>Australia</i> (1976)
	Eureka Prize (1995, 2002),
	Centenary Medal(2003),
<b>Notable awards</b>	Clarke Medal (2004)

Where Does the Carbon Dioxide Really Come From?

Professor Ian Plimer's book in a brief summary:

PLIMER: "Okay, here's the bombshell. The volcanic eruption in Iceland. Since its first spewing of volcanic ash, it has, in just FOUR DAYS, NEGATED EVERY SINGLE EFFORT made in the past five years to control CO2 emissions on our planet.

Of course, you know about this evil carbon dioxide that we are trying to suppress - it's that **vital chemical compound** that every plant requires to live and grow and to synthesize into oxygen for us humans and all animal life.

I know....it's very disheartening to realize that all of the carbon emission savings accomplished while suffering the inconvenience and expense of driving Prius hybrids, buying fabric grocery bags, sitting up till midnight to finish your kids "The Green Revolution" science project, throwing out all of your non-green

cleaning supplies, using only two squares of toilet paper, putting a brick in your toilet tank reservoir, selling your SUV and speedboat, vacationing at home instead of abroad, replacing all of your 50 cent light bulbs with \$10.00 light bulbs.....well, all of those things you have done have all gone down the tubes in just four days!

The volcanic ash emitted into the Earth's atmosphere in just four days - yes, FOUR DAYS - by that volcano in Iceland has totally erased every single effort made to reduce the evil beast, carbon. And there are around 200 active volcanoes on the planet spewing out this crud at any one time - EVERY DAY.

I don't really want to rain on your parade too much, but I should mention that when the volcano Mt Pinatubo erupted in the Philippines in 1991, it spewed out more greenhouse gases into the atmosphere than the entire human race had emitted in all its years on earth.

Yes, Mt Pinatubo was active for over One year - think about it.

Of course, I shouldn't spoil this 'touchy-feely tree-hugging' moment and mention the effect of natural solar and cosmic activity, and the well-recognized 800-year global heating and cooling cycle, which keeps happening despite completely insignificant efforts to affect climate change.

And I do wish I had a silver lining to this volcanic ash cloud, but the fact of the matter is that the wildfire season across the western USA and Australia this year alone will negate your efforts to reduce carbon in our world for the next two to three years. And it happens every year.

Just remember that your government just tried to impose a whopping carbon tax on you, on the basis of the BOGUS 'human-caused' climate-change scenario.

Hey, isn't it interesting how they don't mention 'Global Warming' anymore, but just 'Climate Change'.

It's because the planet has COOLED by 0.7 degrees in the past century and these global warming advocates got caught with their pants down.

And, just keep in mind that you might yet have an Emissions Trading Scheme - that whopping new tax - imposed by your government, that will achieve absolutely nothing except make you poorer.

It won't stop any volcanoes from erupting, that's for sure.

But, hey, .....go give the world a hug and have a nice day.

HERE'S A BRIEF SUMMARY OF EARTH'S TEMPERATURE CYCLES...
