

International Public Notice: Justice Comes to the DOJ

By Anna Von Reitz

Finally, the pendulum has swung on "Lawfare" being practiced by the DOJ. The so-called "January Sixthers" are being released following a Supreme Court finding that they were improperly charged from the start.

The DC Gulag has been breached and 84 year-old Nancy Pelosi is being asked by her own constituents to leave. Gracefully, if possible.

Numerous lower level Federal District and Circuit Court Judges are facing recall and loss of public confidence because of their slave-like willingness to do the will of political and agency officials instead of honoring their own plainly stated obligations under both The Constitution of the United States and The Constitution of the United States of America.

These fawning characters didn't just trounce one part of The Bill of Rights or one Constitutional Amendment protection or one part of the Public Law; oh, no, they went for broke. They violated at least ten (10) actual laws and/or contractual obligations in order to honor a private corporation's "policy" toward the victims of these heinous scumbags.

How is that even possible?

A normal American living in the factual world is bound to wonder.

It's because the courts have been corrupted ever since the so-called Civil War and Americans have been misrepresented as British Territorial U.S. Citizens

and as Municipal "citizens of the United States" since 1937 --- without their knowledge or agreement.

This misrepresentation of our political status and identity set up a constructive fraud that has allowed foreign courts to "assume" jurisdiction over Americans based on False and Unconscionable Registrations ---- and has allowed judges to use their own private "discretion" instead of following the Public Law and the Law of the Land.

This is the actual basis of the Lawfare that has been used by foreign British Territorial "Carpetbagger Courts" ever since the so-called American Civil War --- which was instead a Mercenary Conflict.

These courts were originally set up in May of 1865 for the purpose of collecting war reparations from the Southern States. New "military districts" were set up in these states to expedite this illegal and disguised confiscation activity and the equally illegal mercenary occupation of our country.

By the 1930's everyone had forgotten that these were military district courts and gotten used to calling them "District Courts" instead. To finish glossing over what these courts actually are, Territorial "Judicial Districts" were used to overlay the original military districts, and this system of venal foreign law was extended to cover the entire country.

It's a crime, plain and simple. It has always been an international crime and it is long overdue to be addressed, along with the unlawful, illegal, and immoral mercenary occupation of our country by the British Government(s) and Roman Curia.

This is the underlying reason that these judges could function with such horrible impunity to inflict obvious, gross injustice on the January Sixth protestors.

They have done the same and worse to countless innocent Americans who trusted them and did not recognize the nature of these "courts" and the constructive fraud being exercised against them.

These courts began as undisclosed private bill collection agencies and that is what they still are. They are not owed any respect and don't actually practice law. They are all private bank administrators enforcing court rules, collecting so-called private taxes, and imposing corporate administrative codes, instead.

Contempt of court and perjury are two of their favorite laws to enforce, and these happen to be the same fundamental laws they routinely break themselves.

It is contempt of court to reduce justice to a mockery and artifice used to disguise illegal and unlawful confiscation, racketeering, and coercion.

It is perjury to take a private oath and pass it off as a public oath of office, instead --- but this is what these courts and their officers have been doing for well-over a century and a half.

That's how the DC District and Circuit Court Judges could so cavalierly mistreat the January 6th Protestors; in their minds at least, it was a matter left to their personal discretion, and they chose to violate the Constitutional Guarantees owed to these Americans and to pander to the DC Democrats instead.

Let justice begin.

The Department of Justice has an equally clouded and disturbing history.

When the Scottish Interloper, a Scottish-based commercial corporation merely calling itself "The United States of America, Incorporated" stole the identity of our Federation of States and fraudulently accessed our credit in 1868, they also set up the "Department of Justice" a few years later, as an in-house corporate law firm dedicated to defending this foreign corporation -- at our expense.

So the "Department of Justice" is not, as most people would assume, a part of our legitimate Government. Today, it's a private incorporated entity, still serving as a Flak Jacket for dishonest foreign corporations in the business of providing governmental services.

And still sending their bills for all these "services" to their victims.

They are either the most shameless criminals around, or the dumbest excuses for lawyers on the planet. They have been operating under color of law lacking full disclosure for well over a century, pretending to be a legitimate part of our government the whole time, guilty of Gross Breach of Trust and constructive fraud the entire time.

They aren't part of any government of ours, American or Federal.

Like all the other so-called Federal Agencies the "Department of Justice, Incorporated" is a private, for-hire subcontractor of a Subcontractor of a Subcontractor.

Three layers down in the cesspit, DOJ officials don't know who actually pays their paychecks, but Elon Musk will figure it out.

He will be looking up at the sky and shaking his head and he will know what to do with employees who waste our time and money, and who prosecute us under False Pretenses, and who use bogus politically-motivated charges to do so.

He will fire them. Not for political reasons. For practical reasons.

There should never have been a "Department of Justice" in the first place. The best solution would be to fire the Department of Justice, Incorporated, for cause. Fine it into oblivion. Fire all the "United States" Attorneys working for it. And be done with it.

Imagine their faces when they realize that they were "misdirected" and that the people that they railroaded and persecuted and left in freezing cold prison

cells --- are their actual employers, the ones who pay the bills, and carry the water?

Big mistake. Big. Really big.

There should never be a "Department of Justice" whose job is to defend incorporated governmental services vendors at public expense. The service vendors need to pay their own legal defense costs and do so without the pretense of being "the government".

The cost of their crimes and negligence should be coming out of their own profit margins, not out of our pockets.

This is a small sample of the abuses this country has suffered at the hands of these British Bunko Artists and Roman Charlatans, but a highly instructive one, because the same scheme has been followed like a playbook to foist off other "departments" and "agencies" which are not part of any legitimate American or Federal Government, to imbue them with authority they don't actually have, and pass the cost of all this padding on to the victims.

This practice of operating under color of law is not only a crime in and of itself, it's an open invitation to embezzlement and racketeering and other forms of crime on our shores ---- all made possible by people who take their paychecks out of our pockets and who are supposed to be providing us with "good faith service".
