

Letter to Pope Francis-- Memorial Day 2016

By Anna Von Reitz

Most Beloved Francis,

The lawyers have been bill collectors for the Roman Pontiff since the second century BC. Please redirect them with respect to their activities on American soil.

As you can see from our attached Judicial Notice and Order to Cease and Desist forwarded to the World Court - the Hague and the Office of the Special Prosecutor, they have been running private corporate administrative tribunals as if they were lawful public courts, employing Glosa to misrepresent and mischaracterize living Americans as corporate "persons" and otherwise running amok on our soil.

As the single largest employer of all lawyers and attorneys worldwide as well as inheritor of the copyrights and trademarks of the statutory law, you are uniquely responsible for this continuing situation and the related abuses.

As has already been established by the Vatican Chancery Court, people born on the land of the American organic states are the lawful beneficiaries of the land and no one may claim otherwise.

As has also been established by the Treaty of Westminster 1794 and the Treaty of Ghent 1814 we are also beneficiaries of the international jurisdiction of the sea "in perpetuity".

As Pope Benedict XVI has fully admitted, the secret Treaty of Verona of 1822 was an egregious Breach of Trust, an illegal, unlawful, and immoral act by the then-Pope and the British Monarch, owed nothing but confession, repudiation and correction.

We call upon you to exert your full empowerment as the ultimate comptroller of the statutory law creating all corporations on Earth and your office as the Roman Pontiff to correct the operations of the American Bar Association, the International Bar Association, the International Monetary Fund, the Federal Reserve, the UNITED STATES, (INC.), and THE UNITED STATES OF AMERICA, (INC.), the UN Corporation, and all their franchises and affiliates including the corporation calling itself the GOVERNMENT OF THE UNITED STATES and the PENTAGON.

These entities have functioned as crime syndicates on our shores and have been grossly misdirected by both the British and French Governments and various Vatican operatives in the past and present. This entire mess must be cleaned up, and it cannot be accomplished by pretending that the Creditors are Debtors, via the use of scapegoats, or the avoidance of the facts.

Your efforts of the Motu Proprio of July 11, 2013 are much appreciated. Your decision to give the miscreants three years to clean up their acts and come into compliance with their charters has, as we feared, only encouraged them to redouble their acts of criminality, but we have nonetheless waited out the grace period.

The American people are owed the guarantees of their actual Constitution--- what the Vatican calls our "Original Equity Contract"--- and we have acted properly to claim our property assets, have issued our Sovereign Letters Patent, have established our Joint Declaration of Sovereignty together with the Federal Indigenous Nations preserving our "Original Equity Contract" and have properly asked you in your capacity as Trustee to facilitate the settlement of the so-called United States National Debt by application of our National Credit to balance the books. We have likewise directed the Board of Governors of the Bank for International Settlements regarding our Will.

May we now consider these issues done and settled?

We also understand the embarrassment of the British, French, Japanese, Germany, and many other national governments with respect to the debts owed to the American people. These debts arising out of the need to rebuild after the Second World War together with the interest accrued would indeed be insurmountable and would result in the enslavement of most of the world if we were to insist on repayment. We understand that this concern---the gross indebtedness of the world--- has been the entire motivation behind the apparent international collusion against our lawful government.

Let us ask how much a life is worth and who will hazard to pay it back?

While distracted by the chicanery of international bankers and the digits accruing on ledgers most of the world has been deluded into believing what we can only describe as "lies we have told ourselves". We have not succumbed to such silliness.

We assert that we cannot give life and have no right to take it. We assert that the value of even one life is beyond the ability of the world to repay. We assert that the essence of a good life is to have all that we truly need, to possess some of the things we merely want, to love and to be loved, to serve a noble purpose, to have a home and to live at peace. We assert that this is well within the ability of each of us to achieve and within the Earth's ability to sustain for a long time into the future.

A higher law than any "law" of commerce is called for at this time, a law that requires each man of every faith and nation to come to terms with our actual nature and our actual needs.

We assert that money is nothing but a tool, like a shovel or a rake, which everyone must have access to use to fulfill both their daily needs to pay for food, fuel, housing, water, safe sanitation and similar needs--- and their dreams. Depriving people of money so as to make it a false god is a crime that renders us all in the

ridiculous position of worshiping something of our own creation, as if we baked a cupcake and then bowed down to it.

The accumulation of debt and the holding of debt has to cease and the forgiveness of debt must commence. Let it begin with the American people and their lawful government. We didn't give in order to commit usury against everyone else--- as the "United States" defined as the "territories and District of Columbia" has done.

We gave to give, to restore, to help. We gave of our bodies in war and in peace. We gave of our natural resources, too. We did it to assist other nations to rebuild and have all that they need to live good lives according to their own dreams and traditions---not to ensnare them in a web of insurmountable debt.

Nobody can ever repay the sacrifices made at Dunkirk and Normandy and Hiroshima and Treblinka, but we can all certainly learn our lessons. The Americans have learned.

No other nation has to worry about what they owe us, except the moral obligation to support us when we are right and to assist us now by fully recognizing the fact that the United States Congress has been operating a rogue secondary government and promoting a confusion between that government and our lawful government.

The Federal United States composed of the "territories and District of Columbia" and doing business as the United States of America (Minor) is a separate entity from The United States of America (Major). The United States Congress has operated this kingdom made of paper (and a few stray islands) to defraud the American people and the entire rest of the world via deceit based on similar names.

We are not the problem. We have been the victims of this mischaracterization and misrepresentation and we have suffered along with the rest of the world.

This deceit has been promoted by international banking cartels, corrupt politicians, and senior members of the American and International Bar Associations, some of whom have sought refuge in Mainland China when confronted with the severity of their criminality.

This system was pioneered in China many centuries ago, so it has now come full circle and needs to be destroyed by the same people who first discerned the principle underlying it--- which is summed up by the Chinese proverb: "If you collect the money, you disperse the people. If you disperse the money, you collect the people".

The American people are still provably the Priority Creditors of the entire planet. We have not abandoned our position nor our property assets. We have paid the piper and what we say has to hold, or all the laws of commerce and all the laws of nations fail. So what do we say?

Neither we nor the rest of the world should suffer for the sake of greed, lies, and delusions. A cupcake is a cupcake and a crook is a crook.

We call upon you and all world leaders to honor our contributions and inheritance--- our land, our homes, our lives, our public and organic law----as we have honored theirs, and draw the line between us and the Federal United States which has caused

all the problems, racked up all the debts, and engaged in all these crimes against us and other nations.
