

International Public Notice: For the Love of God and Country

By Anna Von Reitz

The past three weeks have been harrowing times to try men's souls and our resolve as nation-states united, to stand together and to assist our brothers and sisters in times of hardship. The devastation wrecked by Hurricane Helene and to a lesser extent, by Hurricane Milton, have stirred the conscience of America and forced us to take actions that we would never have imagined.

Lawsuits against FEMA and DOD. Investigations into the members of Congress who are occupying vacant seats as officers of foreign corporations. Hundreds of hair-raising search and rescue and supply drop missions daily. Scientific analysis of environmental crime scenes. Formal declaration of Land Law. Forcing local Sheriffs to occupy and exercise their Peacekeeping Offices.

And now, the work becomes even more grim, as it shifts inexorably to recovery of bodies, a desperate race to save those in the higher elevations from death by exposure, and the horrific work of demolition and debris clean up in the middle of an ecological nightmare. Entire river drainage systems are polluted by the dead bodies of thousands of people and animals, compromised septic systems, industrial chemicals, and even radioactive waste.

Soon, snow will come to the mountains, settling its white mantle of peace over scenes of destruction and loss impacting some of the poorest people and poorest communities in this country.

And all Kamala Harris and her cohorts can say is that they are carrying through with their plan and sending billions of dollars worth of aid to Ukraine, and a whole \$750 to each family who lost everything in Appalachia.

By the God of our Fathers, this will not stand. These corporations will be toppled and their leaders arrested for their gross negligence and dereliction of duty, their breaches of trust, and their criminal violations of their service contracts -- abuses which we have all suffered.

The preliminary and greatest fault lies with House Speaker Mike Johnson, who has refused to immediately re-appropriate funds designated for other purposes, to the relief of Appalachia.

Like part of the billions to be wasted on Ukraine.

We are calling for his immediate arrest and prosecution for treason.

We are calling for the investigation, questioning, and arrest of every member of the last five Congresses who: (1) voted for the pandemic mandates and yet, exempted themselves and their families from taking the shots; (2) extended the funding of the various Municipal Agencies (FEMA, BATF, IRS, DOD, etc.) for another three months past the conclusion of the UNITED STATES bankruptcy.

Remember, these people are not our Fiduciary Deputies and are sitting as "Representatives" --- officers of foreign corporations in the business of providing "essential government services". As such, they have no State Immunity and no Public Office, but they have assumed public duties and may be held liable for their acts.

By their actions and their inactions, they have harmed millions of people in seven (7) States of the Union, and they have done nothing sensible to ameliorate this circumstance.

These are the facts. Republicans and Democrats alike. All have failed the test. All are owed removal and we are owed new, public elections.

None of the elections from 1856 to [today](#) have been public elections, thanks to the deceit, malfeasance, and self-serving nature of the miscreant corporate denizens of Washington, DC.

We have seen them at work in Gaza, through their front man, Benjamin Netanyahu. Now we see them at work in our own Blue Ridge Mountain communities. The only thing that holds them back from their avarice is international law and fear that the military and the people of this country will see what they are and fall upon them like the wrath of God.

As we should, for these, their offenses.

<https://www.youtube.com/watch?v=VntZTWxkmO8>

The banks that have given them free access to our credit and that have received our assets from them, full-well knowing that the assets they deposited did not belong to them, yes, the bankers deserve the same treatment, for without them, none of these travesties and injustices would have ever been possible.

And for us, we are left to pick up the bleeding pieces.

Those Americans who are reading this, please consider -- do you have room at your hearthside this winter for others who desperately need a roof over their heads through no fault of their own? Can you spare a few bucks to help transport individuals and families to safety with friends and family members in other parts of the country?

Our State Assemblies are open and helping to identify flood victims and helping them protect their land claims and maintain correspondence with them while they temporarily move to safety in other States. We need to get as many people to safety as we can and keep re-supplying those who remain with winter gear, stoves, fuel, tools, food, and clean water.

Can you support our Land Courts and Counselors of Law, who will protect these families and communities from bogus claims of "Federal Rights of Eminent Domain" (that don't exist) while they are away from home?

Will you step forward into the gap at a time like this?

Make no mistake. This is a long term commitment. We estimate that it will take upward of ten years for remediation and rebuilding, and we fully admit that a number of communities will not survive this attack.

Until we regain full control of our government and our assets and our credit, times will be tough. We have millions of Americans to re-educate about their own history and law. We have hard work to do and a full plate of heartache set before us, but we have faced hard times before and we will face them, together, again.

The evil doers, the Liars, and the Globalist thugs are due for their come-uppance, not their re-election.
