

# International Public Notice: Meddling by the Galactic Council is Prohibited

By Anna Von Reitz

1. The Interstice was closed specifically to prevent galactic and intergalactic meddling in the Earth's evolution and political life; how, exactly, does the current Council propose that violent and unnecessary terraforming of the Earth's tectonic plates and dangerous manipulation of Magnetosphere is not "meddling"?

2. Seven (7) times in the past previous Councils have acted in fear and self-interest to promote exactly such meddling with devastating effects on the Earth and its incarnate biological life structures; entire species have been wiped out by this immoral and illogical meddling which is precisely why the Interstice has been closed;

3. This planet and its conscious beings have the Absolute Right of Self-Determination, and this Council has no authority allowing it to violate Universal Law;

4. The excuses being promoted for the proposed Disruption are scientifically and morally insupportable and unacceptable:

(a) China does not need more land. China needs advanced biodynamic farming technology, advanced water capture and treatment facilities, new energy sources, and most of all, advanced sanitation technologies, combined with some common sense, but China does not need more land;

China is a large country with a large population and challenging climatic and topographic features, but its actual land mass is more than sufficient to support its

population now and for a considerable time into the future, if the Chinese are given access to resources to make the needed changes--- which is well-within the Council's ability to provide.

(b) The idea that this planet is "overpopulated" is absurd; this planet has in the past supported as many as 500 billion incarnate souls, so a claim that it is overpopulated by a population of 8 billion is clearly not rational;

(c) The Democratic Party Administrations and the corporation Presidents that the current Council has been dealing with since the 1930s are not actual owners of anything and do not represent me nor do these persons represent a majority of the living incarnate beings on this planet; any idea that they are the Spokesmen for this planet, or that their cohorts in the co-called United Nations organization are the Spokespersons for this planet, are grossly in Error;

(d) It stands upon the Record that the Traditional and Customary Spokespersons for this planet are all women and that these women have a unique genetic and energetic signature that is known and which must be applied to all Orders impacting biological life and manifestation on this planet;

(e) As your own records show, I am the Lawful Spokesperson for this planet and my freely granted signature is required on any Disruption Order; I do not permit anyone to represent me in this matter and I do not grant permission for any technologically induced terraforming or magnetic grid manipulations, which includes any induced polar shifts. My copy rights are intact and controlling;

5. I am also the Source Arbiter for all female genre expressions manifest on this planet, a fact that considerably overstands any authority possessed by any Galactic Council in regard to our planetary future;

6. My contract specifically forbids and prohibits the death of any of my personal manifestations as a result of tsunamis, "or other forms of waves induced in media other than water", and that does preclude drowning or suffocation or crushing by landslides, mudslides, earthquakes, solid-state liquefaction, lava flows, tornadoes, hurricanes, cyclones, inhaling of noxious gases and exposure to biological plagues resulting from external or artificial manipulation of the planet's biosphere or physics;

Please note that my personal manifestations inhabit all seven continents and there is no way for the Council to implement their current agenda without killing one or more expressions of the female genre.

7. I have made it clear that I am not enduring any more manipulation of this planet from any external Blue Ribbon Committee whatsoever, and I have already alerted the appropriate peacekeeping forces to the clear and present danger created by the Council's proposed terraforming and magnetic grid manipulations; I have asked them to remove and arrest any member of the Council promoting these actions or in any way aiding or abetting these dangerous external manipulations;

8. During the Great Plasma War I exercised compassion for the deluded members of the Refugee Societies who sought safe harbor here; I now regret that action and I rescind that time line;

9. The remnants of those civilizations destroyed during the Great Plasma War have learned nothing from their own destruction and instead of settling down here and enjoying the peace, they have instead promoted constant war, war, and more war, ignoring the fact that war has been their own downfall and would be the downfall of the Earth, too, if they were allowed to continue their presence here;

10. For this reason, I have evicted them for cause and asked that they be removed, permanently, from this planet. They are to be relocated elsewhere to an environment where they can do no more collateral damage to anyone or anything. To that end, I have summoned the Abyssal Knights and their Allies to close the Gates of Hell and clean sweep this planet;

11. This Galactic Council has been more trouble than it has been worth. Instead of preventing external meddling, it has been a source of external meddling itself. Instead of assisting the Earth, the Council has engaged in more than ten years of fear-mongering and politicking and gridlock -- all culminating in an 8th Disruption Order;

12. If that is the best the Galactic Council can do, let me suggest that there are primitive men on this planet who could do as well or better; let me also suggest that instead of allowing us to mop-up problems that were visited upon us by the failures of former Galactic Councils, this Galactic Council has continued a long tradition of meddling in the Earth's physical and political affairs, and has stood in the way of our efforts to self-correct, and has prevented us from knowing the truth

and acting upon it. As such the Galactic Council has been a hindrance instead of a help and I wish to address the nonsensical ideas being promoted to encourage either no action or bad action by this Council:

(a) The idea that the psychology of the living people on this planet is so weak and primitive that we cannot bear the stress of knowing the truth; this not supported by any biological evidence; instead, the Record demonstrates the great plasticity and adaptability of the 13.8 billion year-old genome of mankind, which has in fact successfully generated and given rise to all forms of humanoid life including the life forms of many Galactic Council Members;

(b) The idea that we are ignorant and don't know our own role and identity as Creators -- is an idea so profoundly incorrect that its proponents should be embarrassed for ever giving voice to it. Every technology, every commercial product, every aspect of every civilization represented by the members of the Galactic Council has come from these humble beginnings and there is no demonstrated reason to think that our own derivatives are our superiors;

(c) The Creative Process is something that many members of the Galactic Council don't grasp, having never experienced sex, mortality, and illusion themselves; they should realize, and indeed, must realize the necessity of our endurance, without which there cannot be the ongoing adaptation needed to sustain life in the cosmos;

(d) The idea that the veil of flesh keeps us from interacting with our Higher Selves is ignorant supposition, and you may all readily observe that any incapacity in that regard is in fact caused by more meddling with the natural biosphere, pollution, and externally imposed ignorance purportedly enforced to protect us from ourselves;

13. As we speak an artificial dome, the Hubble Dome, has been imposed as a transport device and it is rapidly dragging this entire planet back to its original station on the other side of the galaxy; the claims supporting this action are as illogical and objectionable as the other issues herein addressed. The idea that we are out of place because we continued to migrate or that we don't have the right to change our location, is akin to medieval human superstitions about not drinking water and not taking baths. The Order of Creation is not violated because we change our planetary location within the Cosmos -- it is instead violated by any forced relocation;

(a) The right of Self-Determination which we set in place within the framework of Universal Law includes the right to move and travel and explore; none of us, certainly no member of the Galactic Council can argue it;

(b) The idea that we pollute the cosmos by entering and exiting it at different time and space coordinates, has no shred of evidence; creation and change are the price paid to advance, and which member of the purportedly advanced civilizations represented by the members of this Council will stand here and face me on this issue? Each one owes his or her existence to the exercise of our volition. Witness the face of my Son imprinted across the Universe, and ask yourselves if you have lost your own minds, as part of your adaptations to your own technological inventions?

(c) It seems that our appearance in different quadrants of the galaxy has resulted in the life, growth, and existence of all these great interstellar societies that represent our own progeny benefiting from millions of years of unhindered natural development, and you would all now show up like ungrateful grandchildren and tell us that our peregrinations have caused you harm? Everything you have and everything you are, is linked to us.

Moving Earth to the other side of the galaxy won't change that nor in any way alter Nature;

(d) Change, though feared, is both necessary and good; it isn't that we object to change and we have often proved that by accepting difficult transitions in our own evolution. That said, change imposed upon others is a violation of their own evolutionary mandate and that is what results from the Council's present actions and the "offer" of an 8th Disruption Order allowing all this meddling in Earth's physical and political affairs, and even changing our location in the cosmos;

(14) Do the members of the Council actually think that we are so clueless and "primitive" that we don't feel all the bumps and lumps that our planet is suffering as a result of the tractoring by the Hubble Dome? That we don't recognize plasma technology? By what authority or logic are these assumptions being made? If this is the best you can do, you all need to go home and leave the Earth to its own devices.

(15) I can destroy the Hubble Dome simply by activating the Ley Line Dome and this is a simple Voice Command. The 60,000 stars per second that are disappearing from your mirrors are not lost and not actually disappearing. This is not the end of the Universe nor the end of Universal Law; this is a natural renewal and the

beginning of a new Universe. We brought you into this Universe; we can take you out of this Universe, and bring you back again. You are, frankly, incompetent to make any judgments about the changes the Universe is now going through, so please spare us the effects of your best theories.

(16) It looks to me like a great many things about the Natural World and the history of this planet and its inhabitants have been grossly misunderstood and misinterpreted by members of the Galactic Council over time, and a proper understanding of the Grand Architecture is lacking. This is what happens when you take the word of criminals and con artists as "Gospel".

(17) The ultimate determination does not lie with the Council; it stays with me, and I reject the Council's Offer and Order to allow the continued tractoring of Earth and also nix the planned terraforming and magnetosphere manipulations.

Sincerely,  
Granna in All capacities.
