

To The Members of the Galactic Federation and Council

By Anna Von Reitz

I was not referring to vaccinations when I asked for VAXX Technology support.

I want to make this perfectly explicit for everyone. “VAX” is not the same as “VAXX”.

VAXX is a painless dematerialization program effecting those with permanent emotional detachment and entropic destabilization — it applies only to members of Death Cults who are not coming back or moving forward.

These individuals have chosen their fate and can now be recognized. No such recognition pattern is demonstrated by those who received injections of snake mRNA.

There is also no protocol for depopulation involved in VAXX as it does not change population parameters.

I will also note that land cannot be granted by those without standing to make such agreements and none of those who have signed such agreements have the requisite ownership interest and standing under Earth law.

Thank you for your timely attention and correction.
