

International Public Notice: Mercenaries

By Anna Von Reitz

Mercenaries, soldiers of fortune, for-hire pirates and privateers.... stop a moment and think. These "gentlemen" have been with us since the dawn of history.

They were the knights-at-arms paid by the local overlord to collect tolls from travelers passing through. They were the pirates hired to harass enemy shipping in time of war. They still are. They still exist.

Today, mercenary operations span the globe and control the ebb and flow of global commerce, but now, they hide their predatory actions and ancient role under the crisp, clean uniforms of national militaries.

Our own military was unlawfully converted into a mercenary force during the so-called American Civil War.

This is why we have the Monroe Doctrine and Manifest Destiny -- a nice political dress-up to allow them to go rampaging all over the world, engaging in all manner of war-for-profit, in the name of "defending" us.

This serves two purposes. Not only does this legalized top dressing of public policy manure allow them to traipse around the globe in pursuit of war-for-profit opportunities, or hire themselves out to the highest bidder, but it gives them an excuse to present their bills to us.

Can anyone tell us how, for example, the war in Bosnia was of critical importance to this country and its people? The answer is that neither this war for profit nor any of the other innumerable fights that have been indulged in worldwide since 1900 have anything legitimate to do with defending this country or its people.

But this is how we have been kept at "constant and perpetual war" for the better part of two centuries. It does explain how Americans bear 96% of the cost of

"defending" western Europe. It explains how Americans have borne the cost of support over 950 military bases worldwide -- an average of four such bases for every country on Earth.

It explains otherwise inexplicable actions by our foreign Federal Subcontractors, too. For example, in the present moment, why is Trump ignoring the genocide in Gaza and extending 16 billion dollars worth of our credit to Israel during his first 40 days in office?

Could it be that his British Handlers have a contract to protect Israel, and have hired the U.S. "Military" Forces to do the job?

If the contract is fat enough, any mercenary will let his head be turned away from truth and honor. He is a mercenary, after all, in the business of plunder and pillaging under force, and for hire.

Just because they have a contract to protect and defend this country --- a contract upon which their own existence depends --- known as The Constitution of the (British Territorial) United States of America, doesn't prevent them from undertaking other work on the side. Like the Spanish American War, the War in the Philippines, World War I, World War II, Korea, and most famously, Vietnam.

It was Secretary of War/Defense (they changed the title to "Defense" during this time period) McNamara who gave us all a clue when he famously described the fight in Vietnam as a "Conflict", not a "War".

A Mercenary Conflict, not a war.

Felt like a war, looked like a war, killed people like a war, destroyed property like a war, but the Vietnam Conflict wasn't a war --- just like the "American Civil War" wasn't a war, and neither have any of the conflicts after that been a war.

It's been really convenient for all the war-mongers and war-profiteers. They just hire us to fight for them, and at the end of the day, they dump all the costs on the American people, as a "defense cost" owed for defending us. Yes, according to them, they are always defending us.

Whether they are guarding the Opium crop in Afghanistan or fighting over French Rubber Tree Plantations, they always find an excuse to charge the cost of their endeavors off to us --- which leaves them with nothing but pure profit, and encourages all the other governments and industrialists in the world to hire them and keep on hiring them for all the Dirty Work.

They dump their profit into slush and pension funds or "economic development funds" like the China Development Fund, and they use this money to go into business for themselves --- every kind of Black Operation imaginable. Drugs, human trafficking, regime change, gambling, racketeering, insurance fraud, organ harvesting, smuggling, gun running, booze smuggling, commodity rigging, counterfeiting, money laundering, securitization fraud, lawfare --- the U.S. Army is the chief competition for the Mob.

They rent out their 950 bases and trade in all the equipment and ammunition bought and paid for by the U.S. Taxpayers (including people who aren't legitimately U.S. Taxpayers) to other Mercenary Forces, like Blackwater, and Blackrock and all the other "Blacks", and pocket the change. Take a good look -- a real good look -- at what happened in Benghazi.

"Our" mercenaries support and pay for the intelligence networks of all these other countries, as long as they get first dibs on whatever the snoop and surveillance networks turn up.

It's not just Five Eyes. It's more like 150 Eyes. Plus all the automated spy-gear that blots the skies and infests common appliances -- televisions and radios and telephones and new cars coming off the assembly lines and smart meters. Don't forget the smart meters -- surveillance devices installed on every home and business, that can double as an offensive weapon, one enabled to blow up and burn down a house or business.

They don't even have to send out helicopters or squads of "Union" cavalry in civies anymore. They've automated everything, including the "civilian population control grid". Just in case all their 24/7 media and propaganda and "education" services fail to castrate your brain, they have other means close at hand.

Here's an example: millions of American Seniors in nursing homes and hospitals are routinely given "Seroquel" a drug that the manufacturer tells these institutions should not be given to anyone over the age of 65, a drug that is known to hasten the onset of age-related dementia, is being handed out like candy in hospitals and nursing homes across America, as a sedative and anti-anxiety drug.

It's a sedative alright, a soft lobotomy that leaves its victims in a permanent daze. It's still being used despite over 25,000 lawsuits, because it is being protected by corrupt courts that are in fact "administrative tribunals" whose only real function is to collect still more money for the corporations running this shit show.

We are all in the thrall of mercenaries, who have slipped the leash and used the resources of our once-great country to secretly go into business for themselves and create a criminal commercial empire that would make Ancient Rome blush.

Quite apart from all their military resources and forces, they have over 500 civilian "Agencies" prepped and ready to shove down our throats, everything from DHS and NSA and FBI and CIA -- which shouldn't even be functioning in this country -- to FEMA and BATF and IRS and BLM and all the other Alphabet Soup Subcontractors of our Subcontractors --- and these "Federal Civil Servants" are kept even more ignorant than the rank-and-file of the "Military Services".

They murder unarmed women and children cowering in a church basement in Waco, Texas, in the name of "protecting us" and they are so goddamned brain dead that they think they are doing the right thing.

Please note -- "Military Services" is a description of the services, even though it's a Mercenary Service providing them.

And, finally, they all seem to think that the verbiage used is more important than the fact of what something is or what someone is actually doing. With the flip of a word, they can redefine everything no matter how repugnant, and make it all legal and nice again.

That comes from lying about who they are and what they are doing for more than a hundred and fifty years.
