

International Public Notice: The Missing Pieces and a Theft in Progress

By Anna Von Reitz

Mr. Trump wants to talk about a stolen straw poll election. We want to talk about his attempted theft of the American Federal Republic, or, more likely, his attempt to foist off a substitution --- a British Territorial version of a "Federal Republic" to impersonate our American Federal Republic.

Let's get down to it.

The original Confederation of States formed in 1781 under The Articles of Confederation did business as the "States of America".

The Confederation and its members, the American States-of-States, like The State of New York and The State of Maine, handled all commercial business for our government at the time.

Commerce, as you will remember, is business between incorporated "public" entities, while trade is business between private and unincorporated entities.

So the Confederation was a representative body that promoted the commercial interests of its members, which were all American Corporations operating under names styled like this: The State of New York, The State of Pennsylvania, The State of California, etc.

Each State of the Union had such a "state-of-state" organization which was called a "Confederate state" long before Jefferson Davis; and, those organizations combined, added up to the Confederation doing business as the States of America.

After the end of the fighting in The War of Independence, and six years after the formation of the Confederation, the Confederation doing business as the States of America won a very important service contract called The Constitution for the united States of America. This was issued in 1787.

Two other much more familiar constitutions would be issued to two other Federal Subcontractors in 1789 and 1790, respectively, but the 1787 Constitution awarded to the Confederation was the most important in our view, because it was the first Federal Constitution in a series of three such constitutions, and it created a thoroughly American enterprise called the Federal Republic.

The Federal Republic was charged with providing the delegated government services enumerated in The Constitution for the united States of America (1787).

The Federal Republic thus created was owned and operated by the Confederation, dba, States of America, which guided and dictated its delegated functions in the air jurisdiction, the global realm of commerce.

To make sure that the Federal Republic was managed properly in the international jurisdictions of the land and sea, State-level Republics were also organized. These entities came in two varieties, and were used to address issues arising on land or at sea under the delegated powers.

Thus we had the Republic of Maine (sea issues) and the Maine Republic (land issues) or, more famously, the Republic of Texas and the Texas Republic. Every State of the Union thus had two "republic" entities as shown, to serve as their direct voice in managing the international functions of the Federal Republic and its delegated powers on the land and at sea.

The American Federal Republic, holding delegated powers on air, land, and sea, was a very important part of the new Federal Government formed under these formal service contracts known as Constitutions.

Our Federal Republic provided for the common and mutual defense of the States, it ran the United States Mint, it dictated monetary and currency policies, it negotiated treaties and trade agreements, it defined and secured the post roads and sea lanes and ran the Federal Postal Service, it provided the Article III Courts, it honored the guarantees made to the American People regarding the exercise of their Natural and Unalienable Rights, and everything about the Federal Republic was American.

This complex regulatory scheme made it possible for the States of the Union to maintain control over the "powers" delegated to the Federal Republic and it worked well enough for the better part of a century: 1787 to 1861.

In April of 1861, the owner and operator of the Federal Republic, our Confederation, lost the required quorum of its member States-of-States needed to operate.

This caused not only chaos and confusion in our commercial affairs, but a general collapse of the Federal Republic and its delivery of the enumerated services. Without the Confederation to back and guide its commercial operations, the Federal Republic couldn't make quorum among the state-level Republics, either.

In true domino-chain fashion, the collapse of the Confederation dictated the collapse of the Federal Republic and the State Republics.

We can argue forever about Abraham Lincoln and what he did next in the face of this debacle, but there can be no doubt what happened.

With the Confederation and Federal Republic both inoperable, Lincoln, a British Territorial Officer (Bar Attorney) and President of the United States of America, Incorporated --- one of the other Federal Subcontractors operating under The Constitution of the United States of America (1789) --- led his corporation to take over the functions of the Federal Republic on an "emergency" basis.

This represented not only a corporate take-over of mammoth proportions, and an equally mammoth change in administrative powers and duties for our British Territorial Federal Subcontractors, but a crisis for our American Government as a whole that has never been resolved.

One third of our government apparatus ceased to function in 1861, and as a result of the chaos and confusion provided by the ensuing Mercenary Conflict known as the Civil War, both the Confederation and the Federal Republic have never been "Reconstructed".

Technically, these missing elements of our Government don't have to be reconstructed and we don't necessarily need any extra services from the other Federal Subcontractors, because our unincorporated Federation of States doing business as The United States of America, which delegated all the enumerated

powers, is enabled to function and provide all the services that both the Confederation and the Federal Republic formerly provided.

We call this "mowing our own lawn". All functions and services provided by the Confederation and the Federal Republic, are functions delegated to them by our Federation, which originally did all that work and provided all those services all by itself.

Our Federation of unincorporated States of the Union can either step up and do the work of the Confederation and Federal Republic, or hire new Subcontractors, or reconstruct the Confederation and Federal Republic to restore the original plan. This is what should have happened in 1861.

Lincoln should have called upon his Employers and the Delegators of all "Powers" exercised by the British Territorial Federal Subcontractor he was responsible for, but he didn't.

It was convenient and very, very profitable for the British Territorial Subcontractors, both in terms of money and political power, to usurp upon their American Employers.

Immediately after armed hostilities ceased in 1865, these schemers rolled in their own British Territorial States of States organizations to replace the American States of States organizations that were members of the original Confederation.

Using a pretense of war and acting under color of law, Lincoln's British Territorials attacked the Officers of the Federation representing our States of the Union --- murdering, slandering, and burning out their own Employers, thereby creating an "emergency" (and profiting from it) that wouldn't have existed otherwise.

They rolled the assets of the American States of States and their respective Republics into State Trusts, but they used semantic deceit to hide the existence of these State Trusts. The assets cashiered in these State Trusts (in "safekeeping awaiting our return") were then used as collateral for them to borrow against and fund their own operations.

This secretive take over was hidden from the American People and excused to the international community as emergency measures taken on a temporary basis by loyal Federal Subcontractors "left in charge" during our "absence".

These False Friends pretended to "represent" us in capacities never granted to them, and told the rest of the world that our government was "in interregnum", while secretly attacking and suppressing the remaining two thirds of the American Government --- our Federation of States occupying the international land jurisdiction and the Union States occupying our national soil jurisdiction, both.

These illegal, immoral, treasonous, self-interested acts were undertaken in Gross Breach of Trust and violation of their own service contract, The Constitution of the United States of America --- but they've gotten away with it, undetected, for over a century and a half, and under their illegal, unlawful, and immoral occupation misrepresented as a "military occupation" --- by men secretly operating as foreign mercenaries, America became a backwater resource dump for them to pillage and plunder at will.

There is a reason that Hiram Grant, a student at West Point, adopted the moniker 'Ulysses S. Grant'. He was Tory from a Tory family that lost land claims as a result of the Americans winning the War of Independence; he styled himself after Ulysses, the Greek Deceiver, who finally overcame the Trojans with the Trojan Horse. General Grant would use guile and subterfuge to entrap and betray his loyal employers to the British Crown Corp, and go on to run one of the most corrupt "presidential" administrations in American History.

The U.S. Army -- a British Territorial Mercenary Force disguised as our own lawful military -- asset-stripped this country, embezzled unfathomable amounts of wealth out of it, and deceitfully used our people as cheap mercenaries that they employed to carry out a worldwide rampage of illegal and immoral war-for-profit actions, all Mercenary Conflicts disguised as "wars".

This misuse and abuse of our men and our resources has had dire results for millions of innocent Americans, but this has also resulted in horrible consequences for the rest of the world as well.

Gluttoned on the unjust enrichment they received, the British Territorial Usurpers expanded their operations --- at our expense --- and cast off their own operational expenses on us with wild abandon and with no regard for the clearly stated limitations imposed by The Constitution of the United States of America.

By 1937, our Holy Roman Empire Subcontractors operating under The Constitution of the United States, had figured out what was going on, and wanted their share.

The two colluding Federal Subcontractors signed The Declaration of Interdependence of the Governments in The United States, and together, they both pretended that our American Government was "missing, in absentia, in interregnum" --- and did nothing to inform their Employers about the roles and powers they were assuming for themselves.

From 1937 to 2015 when Pope Francis pulled the plug on the UNITED STATES (INCORPORATED) we've had two complete sets of Federal Government Corporations and State-of-State Government franchises --- both foreign --- harassing our people, charging us for services we never ordered, illegally confiscating private property, and turning the courts into cesspits devoted to the practice of personage and barratry.

"Federal" citizenship obligations have been liberally misapplied to Americans and we have been impersonated as foreigners and temporary "residents" in our own country by our own public employees acting outside their contractual roles, and many gross liberties have been taken.

The British Territorial Federal Subcontractors have illegally occupied our country and used our resources as the springboard to allow them to illegally occupy many other countries, too. The Municipal HRE Federal Subcontractors have piggy-backed along and vastly expanded their operations beyond the confines of Washington, DC.

All this wrong-doing and self-serving unjust enrichment has occurred in broad daylight and has been witnessed by the international community for many years without a single hand being lifted against it--- except for Russia.

And Russia has been demonized here and abroad by the same Perpetrators who have promoted these crimes against us.

We, Americans, have been lied to and lied about so much that it is difficult for many people to discern the truth.

Currently, Donald Trump, the "President" of the United States of America, Inc., the lineal descendent of the British East India Company, is attempting to illegally occupy and/or substitute a British Territorial Corporation calling itself the "American Government, Incorporated" for our long-dormant American Federal Republic.

This is just a reprise of what the same British Con Artists did when they substituted their States of States for our States of States.

They are going around the country talking up the idea of "restoring the Federal Republic" when what they really intend is to pull another substitution fraud --- and create "a" Federal Republic --- their British Territorial version, in the place of our American Federal Republic.

Put bluntly, the "Restored Federal Republic" they are proposing is another British Territorial Confidence Racket and they are using ignorance and propaganda to promote it.

Patriotic Americans are being confused and deceived and are jumping on this British Bandwagon led by Donald Trump, having no idea that the USA, Inc. is a foreign corporation bent on its own unjust enrichment and on obtaining a new lease on coercive power garnered under false pretenses.

Many Americans are so clueless and have been deliberately left so ignorant of their own history, that they mistake the private corporation's political elections for their own public elections, and the foreign corporation's "President" for the President they are owed.

So Trump and Company are trying to continue and repeat the same substitution fraud promoted by Lincoln -- replacing the American President with a British Territorial Corporation Executive.

The similar illegal occupation and manipulation of the former Commonwealth, seventeen countries in Western Europe, the homeland nations of England, Ireland, Scotland and Wales, Japan, South Korea, Iraq, Libya, Mali, and other national governments that have been suborned, illegally occupied, or simply corrupted by payola from these incorporated British Territorial Interlopers, has resulted in the replication of an illegal and immoral form of Corporate Feudalism --- a system analogous to the British Raj in India --- being expanded and promoted by incorporated entities all over the world.

It's time for this to end and for the Principals, Governments, and Corporations responsible to be held accountable.

We wish to underline the fact that the British people, like their neighbors, the Irish, the Scots, and the Welsh, are not to blame for this; they have been the first victims of these same criminals, and have suffered for as many decades as we have under this same scourge.

The average man living in the British Isles [today](#) has a shorter life span than his continental neighbors, less actual wealth, less credit, worse health care and no property that is actually his own. The British people have been impersonated and misrepresented in the same way that we have, by the same criminally-inclined British Crown Corporations and corrupt members of Parliament.

Mr. Trump and his cohorts need to be fully informed concerning the immoral, illegal, and unlawful aspects of continuing to promote "restoration of the Federal Republic" while they are, themselves, working for a foreign corporation owned by a foreign government, and can no more restore the American Federal Republic than they can stand on one foot and jump to the moon.

Americans are the only ones who can restore the actual Federal Republic. All British Territorials (Tories) can do is whip up their own version of "a" Federal Republic and try to pass it off as our American Federal Republic, instead.

We object to our Federal Subcontractors proposal to occupy our Federal Republic "for" us, and also object to their proposed substitution of their own version of a Federal Republic for ours. We also object to their deceitful creation of a foreign corporation calling itself "the American Government, Incorporated" --- which is clearly an attempt to impersonate our unincorporated American Government.

All this chicanery has to stop and everyone needs to get a grip.

We, Americans, are here, presenting ourselves, competently taking care of our own business. If we had received the due diligence and good faith service that we were always owed from our federal employees, there would never have been any "interregnum" and most of the deplorable history of the past century and a half, including two World Wars, could have been avoided.

More British Substitution Fraud won't be possible this time around, no matter how popular Donald Trump is in an upcoming "popular vote" straw poll.

Our objections are clear and herein clearly stated, on the International Public Record.

The people voting for Donald Trump or any other such "President" are largely unaware of this history, just as they are unaware of the fact that they have been improperly registered as British Territorial U.S. Citizens, and then further mischaracterized and impersonated as citizens of the United States.

It isn't the fault of these Americans that they are this ignorant, nor are they consciously agreeing to accept these foreign "federal" citizenships that have been arbitrarily conferred on them. They've been deliberately deceived, dumbed down, and prevented from learning the truth about all of this, for obvious reasons. They don't even know that they are voting in straw polls related to private foreign corporation elections when they put on their MAGA hats or start waving flags as Democrats.

They've been kept totally in the dark and confused for going on six generations --- deliberately, by people who are taking their paychecks out of their victims' pockets.

The ignorance of the victims makes it easy to prey upon them using False Legal Pretenses, while giving the rest of the world the impression that everyone is voluntarily and happily accepting all this abuse--- just like the purportedly "voluntary" Federal Income Taxes that Americans pay, and are forced to pay, without ever receiving a penny of "federal income" from Uncle Sam.

There is no possibility that these rank and file Americans have any valid "citizenship contracts" with these venal and predatory government services corporations, and no possibility that they know what kind of "President" they are voting for in these private corporate straw poll elections promoted by political lobbyists intent on getting more money and more power for their "party" --- aka, cronies, sucking up to and draining the public trough being illegally provided by foreign corporations latching upon our assets.

These clueless Americans participating in this carnival show are, wrongly but understandably, assuming that they are voting for people running for Public Offices, not private offices in foreign corporations ----- and they are never told the truth about any of it.

The same can be said for Frenchmen, Germans, and Swedes, Canadians, Aussies, Irish, and dozens of others. These nations and their national governments have all

been suborned by these same criminally-inclined "government services corporations" which have been allowed to run rampant.

Donald Trump is not functioning as an American at this time; he has adopted British Territorial U.S. Citizenship and is running a campaign to be re-elected to the "presidency" of the same British Territorial Corporation doing business as the United States of America, Incorporated, that has been usurping upon our people and our government since 1861.

Donald Trump, for whatever reasons, has chosen to be part of our problem, instead of part of our solution.

We are not deceived about the actual position and kind of "presidency" he occupies, and we are not acquiescing to any funny business or misrepresentation of our government. That includes trying to pass off a British Territorial Federal Republic as the American Federal Republic. That also includes trying to pass off a British Territorial corporation calling itself "the American Government, Incorporated" --- for the real thing.

Our actual government is not in any interregnum and the continued pretense that it is, as misrepresented at the United Nations, the Hague, and elsewhere, is ludicrous.

Our fifty State Assemblies are in Session. Our Federation has been active since 1998. Our Due Process and Notice has been served since 2007. Our signatures appear on The Postal Treaty of the Americas 2010. Our Final Judgment and Civil Orders were issued in April of 2014. Our Sovereign Letters Patent were updated and recorded as of [November 4th, 2015](#). Our American Federation Treasury and Continental Marshals Service was founded in May of the same year.

By 2016 we were establishing massive claims and liens against our own property assets in the possession of these foreign corporations. By 2018 we had completed the process of establishing trusts to hold both public and private assets belonging to The United States and The United States of America and the American people.

By 2020, we had all fifty States in Session and took care of long-overdue housekeeping, such as formally enrolling the western Territorial "States" as true States of the Union.

By roll call vote of the properly declared and provenanced members of the State Assemblies, we passed the first Public Law in a hundred years, impacting all fifty States of the Union, outlawing repugnant claims by patent-holders seeking to establish ownership interests in living people and seeking to redefine their political status to that of "transhuman" slaves based on their undisclosed and often unwilling receipt of patented mRNA products foisted off onto the American Public by the same criminally mismanaged and incorporated Federal Subcontractors.

Now, in 2024, we are addressing, among other things, the inappropriate and undisclosed attempts to continue misrepresenting private corporate elections as public elections, recalling our State and County Assembly Courts, and addressing the improper use of non-negotiable Federal Reserve Notes as Legal Tender competent to "pay" any debt whatsoever.

This is your International Public Notice, both private and public, and Notice to Principals is Notice to Agents, Notice to Agents is Notice to Principals, that the American Government is back and on track and not at all pleased with the performances of our Federal Subcontractors who have grossly misrepresented themselves in roles never entrusted to them, and also grossly misrepresented us and the condition of our American Government.

Mr. Trump and the Committee of 300 are advised to Cease and Desist all threats and subterfuges and excuses; their corporations and personnel are under contract and we are fully empowered to enforce upon them for all their misadministration, misdeeds, and malfeasance shown against our lawful government.
