

Monday's Broadcast

By Anna Von Reitz

This past Monday, 31st August 2020, I scrounged up six different hats, literally, and did my famous hat trick, wearing a different hat to demonstrate the three (3) Principal Organs and their relationship with the three (3) Contractual Organs.

They are called this because each of the first three act in a Principal Capacity within a specific jurisdiction: air, land, and sea, and the second three entities act as Subcontractors to them and provide services to the Principals.

Here's Your American Government -----

- (1) The Union, dba The United States
- (2) The Federation, dba The United States of America
- (3) The Confederation, dba States of America

Your Government has Power-Sharing Agreements and service contracts called "Constitutions" with these following subcontractors, which function as the Federal Government:

The "US" Federal Government -----

- (4) The Federal Republic (American, absent since 1860)
- (5) "the" United States of America (British, Territorial Government)
- (6) "the" United States (Papist, Municipal Government)

They pair up under their Power-Sharing Agreements like this:

- (X) The United States (Union) partners with "the" United States (Municipal)
- (XX) The United States of America (Federation) partners with "the" United States of America (Territorial)
- (XXI)

(XXX) States of America (Confederation) partners with The Federal Republic. (This whole part of it is gone and needs to be reconstructed.)

But in the meantime, we can function just perfectly well, as we did from 1776 to 1781, with all international and global powers being vested in The United States of America (Federation).

All we need is for you and all the others to figure it out and come join us. Declare your birthright political status, record it, and join your State Assembly.

This is your country, and it's still yours --- provided that you claim it and own it and take responsibility for it.

Go to: www.TheAmericanStatesAssembly.net to learn more.
