Here, for everyone's interest, is the record for the People's Republic of China's receipt of gold placed with the named banks by Severino Sta Romano acting as the paid Agent of the Avila Family Trust

The PROC received 2.5 million metric tons of gold from the Avila Trust. This is why the Japanese attacked China first in WWII -- hoping to capture this gold to fund their war machine.

After the War a massive recovery and recoupment operation began that resulted in the formation of two large pool trusts, the so-called Black Eagle Trust and the M-1 Fund.

This included some of the assets recovered that had originally been separately on deposit in the Philippines, as well as a deposit to the Philippines Central Bank, which received one of the original 57 deposits from the trust to the central banks ---- assets which were discovered and transported by the Japanese during the War.

Japan also received a massive amount of gold from the Avila Family Trust, again, one of the original 57 deposits, and used this resource improperly to promote war and devastation instead of providing relief to the Japanese people.

During WWII Severino Sta Romano was an OSS officer -- the wartime version of the Secret Service, and worked with the US Navy to repatriate 80,000 metric tons of gold to Fort Knox under Citibank deposit codename E J Landsdale --- another OSS officer working the Treasury Buffer Accounts.

Tracking where the Avila Family Trust gold went and how it was used and abused became a personal cause for Severino who had sympathy for the Avila family, whose only Will for this gold was first stated in the 1520 A.D. Trust Indenture ---and which has remained the same to today: "to break the chains of poverty and ignorance" that have kept mankind enslaved.

Severino was a good man and by exposing his role long after his death we are in no way denigrating his importance and skill and honesty; we are simply pointing out what he often pointed out to his family and everyone else --- he was "only" a for-hire professional employed by the Avila Family Trust and various banks and governments. His name on the accounts never implied an ownership interest in the gold or other assets deposited, and his role as a professional metals depositor was well-known to the banks and intelligence agencies and governments.

And now, you know what his role was, too.

Severino was working under contract to make the 57 deposits to the 57 central banks in receipt of Avila Family Trust gold before, during, and after WWII. Thanks to the chaos of WWII, he later got engaged in tracking what people have called "Yamashita's gold" --- but which was actually Avila Family Trust gold deposited with the PROC, Japan, and the Philippines Government prior to the war.

And here we are today.

The lawful Inheritor of the Avila Family Trust is also the legal administrator and settler of Severino Sta Romano's estate, a position that Severino and Federal District Court of Illinois approved for him, so that any accounts bearing Severino's name are lawfully and legally his to administer and dispose of.

It is his Will that the Avila Family Trust Indenture be honored.

Generations of Church Trustees failed. Generations of government trustees failed. It has come down, after 505 years, to a single man to get the job done --- in spite of the False Trustees who have never paid any attention to what the Avila Family wanted to do with their gold, and who have found endless excuses for never spending the gold to end poverty and ignorance.

All these phony trusts and devices need to be dissolved and re-vested in favor of the living people, and our simple mandate to use the gold to end poverty and ignorance.

In memory then, of Severino Sta Romano and Neil Keenan, and all those who have labored and fought the good fight to see justice done and resources deployed --- not for the benefit of corporations and governments and institutions --- but for the benefit of living people worldwide.

Their final missions had nothing to do with Whitehall or Westminster or Imperial Japan, Rome or the Vatican or Washington. Their final missions were about bringing freedom and relief and peace to millions of people, and--- yes, about fulfilling the Will of one Spanish family, after more than 500 years of waiting.

Mr. Trump needs to know this history and the White Hat military needs to know, too, with no obfuscations.
