

National Assembly Call

By Anna Von Reitz

Hello Anna,

I just jumped on the National Assembly call and they are claiming you've been compromised.

"Mail Service"

Rebuttal

I am Not "compromised" -- just telling the truth against the wishes of some of those who have been running the MGJA for the US Military as a PsyOp and Disinformation Operation. They have set it up to fool people (once again) into stopping short of freedom and settling for "liberty" instead.

And while they have their own grievances, their Territorial Government and its issues should not be mistaken for our American Government and it's issues.

Anyone who wants to stay adrift in the international jurisdiction of the sea and not come home to the land and soil of America needs to leave the Jural Assembly and form a Jural Society instead.

This is not negotiable and not my "opinion". That is the way the law and the jurisdictional issues require it to be.

So-- make up your minds.

Land and soil means one Citizenship only, owed to your State and participation in your State Jural Assembly.

Maritime and sea with Dual Citizenship means that we do not consider you a State Citizen even though the Territorial or Municipal Government doesn't care. It also means that you need to be participating in a State of State Jural Society, not a State Jural Assembly.

They should realize that they are in the wrong on all the matters they are disputing and stop trying to resist the facts I am presenting.

Please post this wherever it needs to be.

They are doing no favors for the people of this country nor are they honorably serving the interests of our military, either.

The lies must end. The truth must be told. The Federal States of States must be reconstructed and our government renewed.

The other choices -- violent revolution or dictatorship -- are both unacceptable and unnecessary. Foreign governments under contract to our States have acted in breach of trust to defraud us and to undermine the Constitutions and the government we are owed.

It's too bad that so many members of the military have been duped, but that is the fact.

They need to get their indoctrination out of the way. They need to examine the actual history and the meanings of the words. They need to stop getting sidetracked and stop accusing others of being "compromised" when it is all too clear that they have led themselves and others into a false political status and have left the people of this country at a profound disadvantage.

I am not supporting the current efforts of the MGJA and do not recommend that anyone continue to participate in this process without taking steps to declare their proper political status on the public record.

Failure to do so leaves people as "sitting ducks" for federal agents and agencies.

And continued obstinate ignorance about the actual history of this country only leaves the festering wounds and all the attendant problems to fester some more.

If anyone tells you that you don't have to formally expatriate from Territorial and Municipal US Citizenship in order to exercise your birthright political status, that person is lying to you.

If anyone tells you that your current efforts negate what other Assemblies have accomplished, that person is lying to you.

If anyone says that you can just wave your hands and do as you please without regard for the history and treaties and jurisdictions of the law-- that person is lying to you.

Whether they are doing so knowingly or unknowingly, they are still lying. And you are at risk from listening to them.

The Federal entities have always allowed Dual Citizenship so from their perspective you don't have to expatriate--- but from our perspective as the States and People, there is only one (1) State Citizenship.

Any Federal Dual Citizen taking part in our Assembly taints the lawful processes we need to engage in. Not only are such persons ineligible to claim State National or State Citizenship, but they must be held suspect as Undeclared Foreign Agents.

This is the law and the fact.

Anyone who won't declare their singular allegiance to their State needs to be kicked out of your meetings and not allowed to take part in your Assemblies.

The land and soil jurisdiction States allow no conflict of interest and no deviation from the principle that no man can serve two masters.

This is in fact why the provisions against Titles of Nobility and the "Missing" Thirteenth Amendment of the actual Federal Constitution exist.

The military is only as good as its leadership is wise and incorruptible. Unfortunately the history of the past 150 years shows that our military has functioned as a mercenary force misdirected to pillage and plunder the States and the People who have loyally met their payrolls.

The Generals have been a "Mixed Bag" at best and things are now coming to a head as to whom and what these men serve.

That we are all in the position that we are in now is a ferocious testament to the fact that our military has been both misled and corrupted.

As difficult as this may be to accept, the facts and the history speak volumes for themselves and leave no other conclusion possible.

I am sick and tired of arguing with the indoctrination and "certainty" of people making assumptions based on what they learned in Eighth Grade or High School.

It's time to realize that your teachers and your history books lied to you, told you half-truths, and left you to make wrong assumptions.

I have seen too many good people go to jail and worse simply because they could not or would not look at the facts, figure things out, and act accordingly.

What I am telling everyone is true. They may not like it. Their ego and their belief system may suffer. But at the end of the day, the truth is all that matters and the truth is the only thing that will stand and provide us with a solid foundation going forward.
