

International Public Notice: Nesara or Nesara?

By Anna Von Reitz

The crying truth is that we already know all this information: <https://t.me/NesaraGesaraSecrets>, and more importantly, how to interpret this information, because we are the ones that put together the puzzle pieces across the last 1000 years and also the ones who were brave enough to publish it and organize a proper response to it.

See our unrebutted Affidavit, "You Know Something Is Wrong When....An American Affidavit of Probable Cause" which has been published worldwide since 2015. Although we can add to that presentation, it is more than sufficient to merit immediate correction and protection.

Over ninety percent of what appears in print and video related to these matters-- the Great Fraud, the misrepresentation, and Nesara--derives from our organized and associated researchers, who have taken up individual topics, and alternative media sources that have tried with more or less success, to regurgitate the information already shared.

While you continue to popularize this idea of "Nesara/Gesara" you are failing to realize that the Evil Ones have completely redefined the concept of the original "Nesara" Legislation and have instead created their own version of it, which leaves them in control.

Wake up by all means, but wake up all the way.

This is what happened, because we were there and witnessed it first hand --- a retired General, Roy Schwasinger, discovered the threat to farmers and ranchers posed by crooked banks and crooked lending practices and he formed a legal defense for the farmers and ranchers with a series of cases

known as "the Farm Union Cases". This effort eventually went all the way to the Supreme Court. They won.

The Supreme Court fully agreed with them --- however, the Court also said, sorry, we can't do anything about this, because you have sued a bankrupt corporation. You can't bring these charges against a bankrupt.

Next, a lone Congressman sought to provide remedy for this situation by bringing his version of Nesara forward. He was laughed out of the Beltway. And there the original Nesara Legislation has [sat](#), with a couple duplicitous amendments, for four decades.

Meanwhile, following their practice of "mirroring everything" the rats created their own version of "Nesara" which leaves them in control even if it is passed. And they are counting on ignorant people to accept this "as if" it was the original Nesara legislation, just as they are bent on trying to pass off a British Territorial version of "a" Federal Republic as the "restored" American Federal Republic.

It's all about impersonation, identity theft, substitution fraud and semantic deceit/confusion. So know who you are, what you are, and don't be confused by similar names and attempted substitutions.

These pikers are playing another fraud scheme, trying to weasel things around to suit themselves, "pay" their debts with credit that belongs to the victims, and keep control in their own hands.

People need to research the actual history and names of things. You will find that the new NESARA is actually under a slightly different name, a change from something like "National Economic Security and Restoration Act" versus "National Economic Stability and Restoration Act", or vice versa. It's in the title of the respective pieces of legislation.

Note that the first Nesara was compiled in the late 1970's early 1980's, and don't be fooled by the later substituted version. The first reading of the actual Nesara Act had only one sponsor. The second Copycat version has several sponsors.

You will also find that the promised remedy of the first Nesara has been substituted and that the second version's remedy is nothing like it --- and is in fact no real remedy at all.

The first version requires the Perpetrators to cover their own debts and/or off-set them against their own debt already owed to the living people.

The second version let's the Perpetrators appear to "pay" using the credit of the victims of this scheme, which does nothing but water-down the impact for individual farms and ranches by spreading the debt to the general population, when all across the board, the farmers, the ranchers, and the general population --- all three --- are not responsible for the debt and shouldn't have to pay for it at all.

The homes and businesses of living people, their farms and ranches, should be held totally harmless; those commercial and municipal corporations that have profited themselves by creating franchises named after each one of us need to be paying all debts and all charges levied against those franchises. That includes all billings addressed to these "things" in both international and global jurisdictions.

Forcing us to continue extending our credit to them in lieu of off-setting against the debt they already owe us, is illegal and unlawful and immoral, in contravention of the legislation and published remedy used to "legalize" their activities in the first place.

Forcing us to "buy" and accept all their various products and services (Driver Licenses, Auto Registrations, Personal Insurance, Property Titles, State Trust Services, plus the "services" of over 350 Federal Agencies and Departments, etc.) that have been pushed on us by our foreign-based Federal Subcontractors and their State-of-State franchise operations ----far above and beyond the enumerated services we accepted from any federal Subcontractor--- is also a form of commercial racketeering and extortion.

Again, this is unlawful, illegal, and immoral.

The guilty corporations and their boards of governors and trustees are the ones responsible for fraudulently misrepresenting average Americans as U.S. Citizens and/or citizens of the United States.

These Persons passed the Sheppard-Towner Act, the Federal Reserve Act, the Emergency Banking Act, the Emergency Securities Act and numerous other Acts while usurping upon powers delegated to our own American Federal Subcontractor.

These Acts were passed and allowed to pass under the presumption that they would apply only to actual British Territorial and Municipal populations living in this country.

Instead, the Perpetrators of these wrongs have, in purposeful self-interest, trespassed against the national sovereignty of each State of the Union and each nation-state within it, and have wantonly registered average Americans as foreign citizens and "dependents" of their corporations, the "citizenry" of which are merely residing in this country under the provisions of the Residence Act.

These corporations, both the parent Federal Corporations, and their State-of-State franchise operations, owe the Usufructuary Duty related to this circumstance and should be paying to hold the victims of their deceit and unlawful contracting practices harmless--- and either using their own corporate profits to pay for any such franchise debts, and/or offsetting any such franchise debts against their current billings.

The situation they created is their problem, but they are still trying to make it our problem.

They are still trying to justify public bankruptcy protection for their corporations, albeit, to be provided by our "public" instead of their own.

And they are still trying to lie and misrepresent and confuse their way out of it.

This is when the old saying, "Don't take any wooden nickels" comes to mind.

Just because something is called "Nesara" doesn't mean it's the Nesara proposed as a remedy for the Farm Union Cases.

This pattern of using semantic deceit to bamboozle people is deeply imprinted upon the history of this entire constructive fraud and the impersonation schemes and substitution fraud schemes associated with it; those who forget this are doomed to relive it.

Please send this missive directly from the Fiduciary Office of The United States of America (Unincorporated) to the mailing list that received the email video link <https://t.me/NesaraGesaraSecrets> and any other living people who need to know.

We appreciate that the authors and filmmakers did a diligent job of explaining the crisis and the fraud in the terms that they had available to them. Any wake up call that is within the domain of reality is appreciated. However, to secure and discern actual remedy requires greater skepticism and a more practiced eye.

Properly weighted and painted, a wooden nickel can appear to be very similar to the real thing; if you don't know what you are looking for, and don't know what an actual nickel should look and feel like, it's even easier to be deceived.

Please encourage people to stand up and cast off the Legal Presumption that they are operating as U.S. Citizens or citizens of the United States, either one.

We are Americans and the only citizenship we have is State Citizenship.

Nearly everyone in this country has been deliberately mischaracterized as a Federal Dual Citizen via an undisclosed and generally unconscionable contracting process that must be exposed and objected to.

Our actual American Government has been summoned into Session. All fifty (50) natural States of the Union have now been properly enrolled and are currently in the General Assembly Session. It's strongly advised that you

take back your birthright political status (and "reversionary trust interest") and join your State Assembly [today](#).

This international fraud scheme has been implemented one American baby at a time and it must unravel one American adult at a time.

Being counted as an American will require a one-page Declaration and two Witnesses who can reasonably affirm that you are the man or woman who was born on --- and then trafficked away from --- the land and soil of your birth, via the above referenced Third Party foreign citizenship contract, and as evidenced by the issuance of a clearinghouse certificate deceptively presented as a "birth certificate".

Thank you for your continued efforts to educate the public, but be sure that the education you provide is both honest and correct.

Don't be used as an unwitting tool of evil men trying to brew up another constructive fraud and pass off a phony version of Nesara that ultimately benefits themselves at your expense and the expense of your neighbors.

It's time for the corporations to pay their own bills out of their own profits, and for both the assets and the credit owed to the living people to be returned, unharmed.
