

# New Year's Eve 2016 Greeting

By Anna Von Reitz

It's New Year's Eve. Where I am, the skies are leaden grey, the temperatures cold, and the days are dark. I am holed up like some small furry animal in a burrow watching the swirling snow and everything is very quiet. The day has been spent making whatever progress could be made in a mountain of correspondence and on house cleaning----getting ready to greet 2017 and make a clean start.

I suppose people don't remember this, but besides being "Judge Anna" I am also a woman with a house to keep, dust bunnies to chase, and an endless fight against dog hair that has been ongoing since 1956.

Many great things have happened in 2016. Jural assemblies have been re-established in many counties and American Common Law courts have begun functioning again throughout these fifty states. A great many people have awakened and they are now engaged in awakening others.

The Living Law Firm has made great strides in unraveling the mechanisms of the Great Fraud and its many symptomatic results---- unlawful foreclosures, corrupt banking practices, kidnapping, unlawful taxation and more. I feel more encouraged than ever that we shall soon have the keys to unlock the central identity theft upon which these evils depend.

Gallant research groups all over this country and abroad have made stunning progress. Thanks to researchers in Australia we now know for sure exactly what the All Capitals Name is and how it is being used to defraud us. Thanks to researchers in Canada we now know how the Queen and the Vatican have siphoned and laundered American assets through Canadian banks. Thanks to researchers in this country we now know for sure that the "American Civil War" wasn't actually a war at all, but was instead an illegal mercenary conflict staged on our soil-----and an international crime.

We have come to understand the depths of British perfidy and depravity. While obligated by most solemn international treaty to act as our Trustee on the High Seas and Navigable Inland Waterways, the British Monarchs from George III onward have steadily and secretively acted in Breach of Trust against the American people and have sought the overthrow of our lawful government and sought to replace our lawful government with a system of commercial feudalism similar to the Raj in India.

We know for sure that the American Bar Association has acted in breach of the Bar Association Treaty of 1947 and that they have been instrumental in the effort to mischaracterize, defraud, and enslave the American people. Researchers in New England, Georgia, Texas, and California have proven without a doubt that Bar Members have been barred from holding any office in our government since the early 1800's and that they have finagled the British-controlled "federal government" to create a system of "federated states" called "States of States" to usurp upon our lawful government.

Indeed, the process of defining "The Problem" is well-advanced and the secretive enemies of the peace and the people are now clearly in view. These undeclared foreign agents, members of the Bar Associations, have been wrecking havoc and pillaging and causing trouble on our shores for a hundred and fifty years. For this, we have the Lord Mayor of London, the Lords of the Admiralty, the Queen, and the Pope to thank.

As we bring 2016 to a close, it's time for Americans to stop "shooting ourselves in the foot" and apply ourselves to creating remedy for this circumstance.

Donald Trump has been elected to serve as President of the federal corporation(s) and he clearly has a new policy agenda, but that is what it is--- a policy agenda of a CEO. While it is to be sincerely hoped that he will bring the so-called United States Congress to its senses and clean up the mess in Washington, DC, we must realize that reform of the federal government is only one part of the solution we need.

We are called upon to self-govern in this country, and it is axiomatic that if we fail to govern ourselves, someone else has to do the job for us. The permanent solution requires declaring our proper political status as American state nationals, forming our lawful county jural assemblies, forming our lawful state jural assemblies, and finally, choosing fiduciary deputies to convene an actual Continental Congress to act in behalf of the states on the land.

There's a lot of work in front of us and the members of the Bar Associations will be trying to gainsay and discourage and disparage our efforts to keep us from doing it every step of the way. The ascendancy of the people's government will spell the doom of their own hegemony, for while they have been claiming to be our stewards, we have been defrauded of our rights and our sovereignty, our land and our labor.

When we appear in our true capacities, their claims against us fail--- and they are revealed to be faithless, dishonest, self-interested servants of the British Monarch and British Crown engaged in illegally pillaging American public trusts. It is completely understandable that the members of the Bar Associations would try to portray us as "Tin Hats" and seek to hide from these facts to avoid their own guilt and culpability, but the facts are nonetheless the facts.

Whatever government they are running on our shores, it isn't our government. It has nothing to do with us and it has no right whatsoever to make any claims against us or our assets, no ability to regulate us, no public delegation of authority to rule over us and no valid private contract to do so, either.

The American Bar Association is running the biggest racketeering scheme in history on our shores and getting away with it, simply because millions of Americans are still asleep, still waiting for "George" to do it all for them.

This is your 2017 wake up call.

A dozen times a day I have people asking me --- what's going on? And I turn to the culprit and say, "I dunno. What are you making happen?"

George Washington has been dead over 200 years. There's nobody here but us chickens.

If you want to see things change for the better in 2017, get busy and make them change.

Declare and record your lawful political status. Expatriate from any presumption of federal citizenship. Rescind all voter registrations and powers of attorney issued effective with your first birthday. Create a witnessed record of your action and establish it either by publication in the local newspapers or recording with the county land recorder's office.

You and like-minded people in your county are now ready to convene your actual county jural assembly and to choose among yourselves a county sheriff to enforce the organic and public law, justices of the peace to run your American Common Law courts, and all the other county offices you may need or see fit to create.

Having restored your county government, it is time to do the outreach and gather together the other counties to restore the lawful and actual state government.

It's a lot of thankless work, but it has to be done.

The other thing that you can do is to support those who support you. The Living Law Firm and the Research Groups need ongoing funding to continue their vital work. Some of our best people are men in their 30's and 40's with young families to support and they have given up lucrative careers as attorneys to do the right thing. Others are retirees on fixed incomes who are traveling many miles on research assignments and having to pay for certified copies of documents out of their own pockets.

All of these people are continuing the work despite being attacked on every side by paid agents of these rogue federal corporations and harassed by their hired mercenaries acting under color of law. If all you can do is send these guys \$5 and a prayer, at least do what you can do.

I want to thank all those who have taken the plunge and made the commitment to take action in their own behalf and in behalf of their country in 2016. I want to thank all those who have taken the time to read and think for themselves. I am deeply grateful to fellow researchers near and far---from Queensland and Alberta, from Glasgow and Mombasa, from New York and Shreveport and many other states and places throughout the world where men still cherish freedom.

Happy 2017 to you all!
