

# Public Notice to All Non-Health Sector Corporations in The United States

By Anna Von Reitz

This announcement is for all US Corporations and all USA Corporations that are not part of the for-profit Health Sector.

The Department of Defense, the unelected National Security Council, and the Health Sector Corporations, especially the CDC and NIH, have killed two-thirds of your customer base. Deliberately.

They knew from their own research statistics that the seven year survival rate for mRNA "therapies" is 1 in 40,000.

So, 1 in 40,000 of the children injected with this slow poison will be alive seven years from now. Most of the little ones will never get out of grade school.

The children and everyone else who took the gunk will die from a myriad of opportunistic diseases as their immune systems inexorably break down --- just like AIDS.

They killed your future.

They killed the housing market.

They killed your customer base.

They killed your friends, family, and relatives.

They killed your business.

Maybe they've even killed you ---if you took the jab.

They did this with malice aforethought, for profit. This is not a joke, not a theory. This is proven by patents, government contracts, and Congressional Acts.

Congress exempted themselves and their families, their staffers, the CDC employees, the Big Pharma Corporation officers and employees---- and left you and your employees to be the victims.

Need a bigger smoking gun?

Whatever future you thought you had, is gone. Thanks to them.

Now, the clock is ticking. And you have the chance to make your losses -- business losses and personal losses --- count for something.

Go to: [www.theamericanstatesassembly.net](http://www.theamericanstatesassembly.net).

We are the lawful Government and we're still standing. Bring your losses, your liens, and your expertise.
