

## About the Supposedly "Missing" Original 13th Amendment.... A Recap of the Scam

By Anna Von Reitz

It's true that there is another 13th Amendment", but it's not missing and the circumstance is not exactly as people are interpreting it. They think that there is one Constitution and that the so-called "original 13th Amendment" was ratified and then mysteriously disappeared.

In fact, there are two different constitutions involved. The Titles of Nobility Amendment was ratified by the original land jurisdiction states in 1819 and became part of The Constitution for the united States of America.

It was not included in the look-alike, sound-alike Federal (Territorial) Constitution published in 1868 as the Constitution of the United States of America. Instead, the 13th Amendment to that document was the one consenting to the abolition of slavery everyone is familiar with.

In addition, there is also a Federal (Municipal) Constitution called the Constitution of the United States. This is the "Constitution" that YOUR Congressmen and Senators are taking their oaths to----hence the reason that they are not concerned about honoring the other constitutions, are not responsive to your needs, and don't represent you.

The lawyers, the Popes, the British Crown, and the British Monarch all pushed and supported the Federal Territorial Constitution, because under its provisions the Pope's bill collectors and the British Monarch's "maritime fleet" could continue to be here and work without being prohibited from holding office or facing other penalties resulting from the conflict of interest that is part of their membership in the BAR Associations and loyalties to the British Monarch.

If you go back to The Definitive Treaty of Peace, Paris, 1783 which ended the Revolutionary War, you will see that there are two populations present---- the "free, sovereign, and independent people of the United States" and the "inhabitants"--- British soldiers, bureaucrats, and Tories loyal to the King, who are left here after the war to provide "essential government services". The same language is then echoed in the actual Constitution in Article IV.

Thus there have always been two groups --- the American people living in their fifty separate states collectively known as "the people of the united States of America" and the "United States Citizens" who merely reside among us in order to provide the

nineteen services delegated to them under the original equity contract ---- The Constitution for the united States of America.

The patriots and the Tories have lived together cheek and jowl ever since.

The illegal mercenary conflict known euphemistically as the "American Civil War" was actually a fight between these two opposing groups and the various European banks that had dogs in the fight. At the end of this illegal "war-in-name-only" the Southern States lay in ruins and the Northern States were bankrupt and under receivership of bank-appointed Trustees.

The United States of America would not re-emerge from bankruptcy until 1907. Note the capital "t" on The United States of America. Meanwhile, a federal corporation named "the United States of America" would operate as its doppelganger.

While the Carpetbaggers ravaged the South, bank Trustees operating as members of "Congress" raped and pillaged the North, too. They have continued this "cozy"----- and totally illegal ---- arrangement to the current day. Ask the Congressional Research Service. The operative parts of the Reconstruction Acts have never been repealed and are still in use.

It was also during this time immediately following the end of the Civil War that the venal court system got a toe-hold (May 1865) the Rump Congress established ten military districts throughout the eleven vanquished Southern States. The military commanders in charge of these districts were allowed to appoint civilians loyal to the union cause to serve as magistrates and judges in these "district" courts---- and so, "United States" District Courts came into being, as opposed to Postal District Courts, which the people are owed, and the international jurisdiction of the sea (martial law) was imposed instead of the Common Law.

Using these foreign law forms, the perpetrators were able to summarily deprive people of their rights and their property, just as they are doing today.

All of this was accomplished under color of law, by constructive fraud, by similar names deceit, and unlawful conversion of property interests beginning in 1865. The perps have tried to justify this by claiming that they and their government are in a constant state of "war" of some kind or other, and claiming "war powers" that were never granted to them, etc., etc., but in fact what started as fraud ends as fraud, as fraud taints everything it touches and nullifies all resulting actions.

We are here today, 150 years later, cleaning up the results of the so-called Civil War.

It is high time we all knew and faced the facts.

President Trump, as Commander-in-Chief, can shut down all the United States District Courts and "federated" State of State Courts which also operate under color of law on American soil. He can lawfully do away with the problems he has encountered with the Circuit Courts bucking him. And there is already US Supreme Court precedent deciding the issues: Milligan Ex Parte, very clearly states, that when American Common Law courts are present, the military courts must disappear.

And so they did largely disappear for a period of years, from approximately 1880 to 1965, we had Federal (Postal District) Courts operating and Federal Marshals protecting the undelegated powers of the states and the people.

But the rats were hard at it, trying to get in the grain again..... and they came up with "Federal Revenue Sharing" and "Block Grants" as the bait to fully re-institute their "Reconstruction" scenario and give full power to pillage and plunder to their bogus maritime courts.

State of State franchises had first been established under the auspices of the United States of America, Inc. that was bankrupted by Roosevelt in 1933. These were operated under names like "State of Wisconsin" and "State of Minnesota" and also under names like "Elizabeth Emily Jacobsen" and "Frederick William Sloane". When the parent corporation was declared bankrupt, the "State of State" franchises were offered as sureties for the debt. (Conference of Governors, March 6, 1933). Those State of State organizations had placed undisclosed liens against our names and our private property assets and had hypothecated debt against them, so, the "US Trustees"---Federal Reserve, IBRD and World Bank appointees--- came in and seized title to literally everything in sight. For the next 66 years, Americans would be forced to pay off the debts of a mostly foreign, privately owned governmental services corporation and never be told a word about what they supposedly agreed to or how their participation in this scheme was secured via various adhesion contracts that were misrepresented and non-disclosed and forced upon them as "government mandates"---- social security, driver licenses, marriage licenses, and registration of births.

But, the government services still had to be provided, didn't they? So FDR signed over the interest in the United States of America, Inc., and its sureties to the IMF at Bretton Woods, and two years later, the IMF took over as the UNITED STATES, INC. and fronted its very own franchises -- like the STATE OF WASHINGTON and the COMMONWEALTH OF MASSACHUSETTS. And they followed in the footsteps of FDR to set up franchises named after living Americans--- a vast crime of personage and unlawful conversion and enslavement. This is where the all capital names -- which are actually not names, but alphabetical account ledgers--- appeared. Thus we have "MARTIN ALLAN SHEHAN" and "LUCY MAE SCHELLING" magically added to the tax rolls and all interest in their property is rolled over and "donated" to the IMF as abandoned property and the actual living people of the same name are deemed to be "Account Holders" liable to pay the debts of these concocted legal fiction entities.

Add a crooked "double accrual accounting" bookkeeping system, whereby the debts of "MARTIN ALLEN SHEHAN" are assiduously pursued by the IRS as debts owed to the UNITED STATES and STATE OF CALIFORNIA, and the credits owed to "MARTIN ALLEN SHEHAN" are just as promptly collected and maintained by The Internal Revenue Service as a credit ledger that the UNITED STATES and STATE OF CALIFORNIA can borrow against, and you have the rest of the fraud in hand.

None of the people thus victimized were ever told a word about any of this. They never knowingly, willingly and with fully disclosed consent agreed to any of it. It was all foisted off on them by crooked lawyers, crooked bankers, and crooked politicians, enforced by crooked and/or unknowing police forces, and shoved down to the tune of Yankee Doodle Dandy.

So now here we are, the whistle has been blown, the non-existent "National Debt" has been repudiated as an obvious fraud and odious debt. The American people have finally stood up and said, "WTF is going on here?" and President Donald J. Trump needs answers.

Our Living Law Firm has plenty of answers. We are inviting President Trump and his advisors to Philadelphia to see what we can all do to finally straighten this 150 year-old mess out, regain control of our country, restructure our international relationships, and fix the broken world economy.
