

# International Public Notice: More Explicitly About "Our" Elections

By Anna Von Reitz

**Yesterday**, we made it clear that the American Elections for Public Offices in this country have been suspended for many years without the Public being made aware of this fact.

We noted the difference between our calendar and the calendar used by the Federal Subcontractors.

This difference results in our Presidents being inaugurated in March, not January.

**The elections currently ongoing in this country are not elections for any Public Office.**

The election involving Donald Trump and Kamala Harris is for the "presidency" of a Federal Corporation which is a foreign governmental services provider that is supposed to be operating under one of the Federal Constitutions.

By analogy, Larry is President of a **country** called The Federation of Liptonian States. Felix is President of a **corporation** calling itself the Federation of Liptonian States (Incorporated).

This is the sleight of hand that has been going on here for over a hundred and sixty years.

The British Territorial Subcontractors simply confused people as to which (and which kind) of presidential office was being filled, and substituted their corporation's "President" for our country's President.

This act of gross Breach of Trust and Fraud results in all elections and all election results in the past 164 years being conceived in fraud, and all rendered null and void.

The corporate election results for their "Presidential" Election in 2020 were tampered with. We know that, but it doesn't matter, because the popular vote itself doesn't count.

Their Presidents are actually elected by the Electoral College.

That's how Gavin Newsom and other scum get away with letting illegal migrants vote in these corporate elections. Not a single popular vote cast in any of these elections count. It's a farce.

The only political purpose these elections have, is to mollify the public and make people think that their votes matter ----when they don't. This is another act of fraud against the Public Interest perpetuated by these foreign "service" corporations.

The only practical purpose these elections have, is to create presumed "shareholders" for these perennially mismanaged and bankrupted corporations.

Unknown to the victims of this fraud scheme, when they "register to vote" they enfranchise themselves --- like a Dairy Queen franchise -- and become responsible for the debts of the parent corporation. They also accept the policies of the parent corporation as "law" and obligate themselves to obey these policies -- whatever they may be.

They also unknowingly donate their proxy as shareholders to whomever the Electoral College selects.

The results of these "elections" are fraudulent in that the actual mechanisms are not disclosed to and understood by the participants. They don't know they are participating in a straw poll.

The voters are deliberately misled to think that they are electing the President of this country, when in fact, they are not electing anyone to any office, and even if

their votes did count, they would instead be electing the "President" of a foreign governmental services corporation.

Neither are the participants aware that by registering to vote in these elections, they are accepting the debts and policies of these foreign corporations as law and giving away their proxy to whoever "wins" the Electoral College vote.

So, not only was there gross election fraud in their 2020 Election, and not only will there be gross election fraud in their 2024 Election --- if it is allowed to go forward at all --- but the election itself is fraudulent in all these ways.

These corporate elections are misrepresented as Public Elections when they don't result in filling any Public Office.

These corporate elections are misrepresented as popular elections in which the votes of the people count, when in fact, they are just straw polls.

These corporate elections are misrepresented in that the ill-effect on the voters is not disclosed; people are not aware of the financial and other obligations they are taking on by registering to vote and participating in these straw polls.

For these reasons, we consider these elections to be criminal in nature, designed to entrap and defraud and unconscionably obligate voters as part of a gross constructive fraud against the people these corporations are supposed to serve in good faith and honor.
