

Please Pray For Mainstreet

By Anna Von Reitz

I have spent the day pouring through piles of correspondence--- answered what I could, and despaired of the rest. My helpers have done their best to sort mail into piles and with any luck donations for the Living Law Firm and the 50 States Claim have been gleaned out and distributed to the many who need support to continue their work.

As always I am overwhelmed with the misery and the vast numbers of innocent Americans who have been silently, day after day, preyed upon---- property stolen, lives ruined, years spent in prison, all under the guise of law and order and the American Way.

Read Psalm 119: 105-178, if you would commune with me tonight. This is my outcry tonight and the outcry of all those who have not forgotten His Ways and His Commands, who remember what the Law really is and is supposed to be, as opposed to this horrible corporate sham.

I am here to tell you that the United States--- our "neighbor" headquartered in the District of Columbia has been the author of this misery and the cause and the reason from Day One. While pretending to work with us and for us, it has done anything and everything to undermine, steal from, and ruin America. Both the British and the French Governments and those backing their Central Banks are responsible, as are the Vatican agents who have stood mum and profited and looked the other way.

Let the Truth and the Fruits guide your way. If any man, cause, or religion would have your allegiance, let them prove worthy with thought, word, and deed.

We all bear a part of the responsibility and own a share of the fact that things have come to this, a time when we have had the rankest kinds of criminals running our government and presiding over our courts. We have not done our part. We have been asleep at the wheel. We've been here and yet not present, lulled into a dull and deadly complacency, fooled by political parties and sideshows, brand names and semantic deceits, thinking that someone named "George" could do it all for us, though he has been dead for over 200 years. I still run into that every day---

someone wanting to rant at me under the assumption that it is my job--- and not theirs--- to run the actual American government.

To the extent that our government exists or has ever existed, it is an inner government that begins with ourselves; it exists in our determination to govern ourselves and to do so according to high principles, to choose those principles with discernment and to join with others in pursuit of their manifestation on Earth: we hold these Truths to be self-evident....that all men are created equal.

Today, it has been announced that massive bounties payable in gold are being offered for the arrest of former leaders of this country. There can be no doubt that mercenaries from around the world will flock like crows, eager to waylay such familiar figures as the Bush Family and President Obama. That these false leaders are guilty of many sins and omissions cannot be disputed, yet in my opinion, the true problem goes much deeper and lies in fact not with these kings, but with the king-makers, who are now offering these people up as sacrifices for their own sins.

Ask yourselves--- who has a ton of gold to offer as such a reward, and who would answer the call to claim such a reward? Only members of the Illuminati, the Pope, the Queen, a few foreign governments have tons of gold to give away. Only bounty hunters will answer, violent commercial mercenaries motivated by such things as gold and now they will be "in action" on our shores, prowling around in quiet hamlets like Crawford, Texas. And the local police will have to do battle with them.

All those who are celebrating this action by the "White Dragon Society" think again. A form of gangland style war has begun on our shores, without any big news announcement, without any vote from Congress. And we must ask ourselves----- why?

Our failure to arrest these people and hold them accountable ourselves is the root of all of this. It should have happened years and years ago. We should have arrested the entire remaining Congress after the Civil War and charged them with treason. The Army dawdled, concerned about their pay--- then as now----and we slept on.

We should have arrested those who passed the Federal Reserve Act and executed them for treason.

We should have arrested FDR instead of electing him for four terms.

We should have and we would have, if we had known, but we mistook the "United States" as part of ourselves and so it has continued on its destructive, venal course, and we reap the inevitable truth that when you fail to govern yourself, someone else is eventually forced to do it for you.

I don't doubt that Comey's failure to indict Hillary Clinton and Jacob Rothschild's attempts to play still more games in France have been the final straws mandating all of this. Perhaps, too, our recent Estate Claim Letter laying bare the history of the Holy See's former involvement and present responsibility with respect to the ongoing criminality of our court system and banking system has prodded certain parties into action.

So now we have foreign mercenaries of every kind and stripe coming to Mainstreet, America.

The very best thing that could happen would be for those named to voluntarily enter into protective custody and to remain in protective custody pending trial. In this way, the whole situation could be diffused and lives could be saved. The second option, which would also be acceptable, would be for our own police and military to arrest the miscreants pending trial. It might be too little and too late, but at least we would be taking responsibility and enforcing order on what will happen anyway.

Tonight, please accept my special thanks to all those men who stepped forward in support of our 50 States Claim and all those who have sent donations to me, purchased our book, and supported the Living Law Firm. We can't possibly respond to the sheer volume of correspondence, but you can be sure that we hear and we care and we are doing everything we can to restore honesty in banking and government and justice to the courts. This is a battle no less than any other battle and we are against vast and evil forces. Our poor country is still struggling with issues left over from the Civil War, but we must all place our lamps on a lamp stand and let them be burning brightly even so---and each of us, according to our own insights and talents must take up our part.
