

Thirty-Five States Online With Our Prosperity Centers

By Anna Von Reitz

Today we celebrate another milestone. Thirty-five States of the Union are ready to receive prepaid credit as a first step of restitution for overpayments and payment of debts that were never ours that have been paid by Americans over the past 160-plus years.

This is credit that is owed back to each and every one of you --- not welfare, not "benefits" ---

The vision for this goes back almost twenty years and is still unfolding.

In days to come, we look forward to opening brick and mortar Prosperity Centers to replace the commercial maritime banking monopoly that has obstructed trade under False Pretenses for decades and cheated and impoverished Americans and American businesses.

If your State Assembly is dragging its feet, it's time to get your State Treasurer elected and your accounts set up.

The service is **free** and the Prosperity Center accounts are available to American State Nationals and American State Citizens.

Don't get left behind and don't get confused.

We have completed the very extensive work of building out a new, clean, global banking system that is competent to trade in gold and silver, asset-backed currencies, credit instruments such as the prepaid credit owed to Americans, fiat currencies and other commercial paper.

We've also built the asset reserves, a new Federation of States Treasury, our own foreign currency exchange, and all the supporting architecture so that we -- living

people worldwide -- have a way out of the oncoming banking collapse, which will otherwise impact everyone.

There has been a series of several different groups charging exorbitant fees to help people get through the paperwork involved in declaring their proper political status as Americans and setting up their bank accounts. There have been reports of people charging thousands of dollars for this "service".

All the Federation paperwork is free. Global Family Bank has made its services free. The idea that Americans having the skill to do some basic computer work are mystifying a simple process and charging others thousands of dollars for what they received for free themselves, is repugnant.

We aren't going to get into a lot of details, or make a lot of accusations or do the drama thing. Just be aware that our services, paperwork, information, everything, is free.

The process of declaring your political status and setting up your bank accounts is simple enough so that anyone in your family or circle of friends who knows how to scan and upload three pages of information can do this--- which is now about every High School student on Earth. Many public libraries offer computer access and printer services, and the librarians can show you how to upload your paperwork and print copies for your records.

If you do it yourself, it's free or very nearly so, counting the cost of copies. If you hire someone to do it, it shouldn't cost more than about \$30 for this service, including copies of the finished records.

So --- keep your Shinola Sensor turned on and get your State Assembly Treasuries and Officers in place and your own individual accounts set up.

Get ready and prepare for a banking system built for people -- not corporations. When the time comes, you and your family won't have to worry and fret or struggle to find money and means to exchange, which is why this entire effort had to be made.
