

Public and Judicial Notice – Number 2

The actual Constitution owed to this country is still in full force and effect despite the bankruptcy of the two major federal corporations doing business as the UNITED STATES and USA.

In November of 2015, the unincorporated United States of America took action to re-issue Sovereign Letters Patent and to secure new federal service providers under the express trust conveyed by The Joint Declaration of Sovereignty issued at that time.

The American Native Nations subscribing to these published agreements are our federal service providers.

Notice and copy of our action was provided to the Principals and the Principles of the Higher Contracting Powers worldwide including Pope Francis, HRM Elizabeth II, the United Nations Secretary General, the World Court, President Obama and numerous other parties of interest.

We are and we remain competent to conduct the business of the organic states and people, and we can and do exercise all non-delegated powers.

James Clinton Belcher, Head of State
United States of America
