

International Public Notice: The Reasons

By Anna Von Reitz

The reason that the banks will "bail in" and confiscate your deposits is not to steal your "money", because as already explained, what's in their banks isn't money.

What is tracked in all those bank accounts is debt (I.O.U.s) -- like the Mother of all Bar Tabs, held by the Federal Reserve Banks, and, in a form that is not negotiable because there is no "sum certain" to be repaid in actual money, and no due date for it to be repaid, therefore, worthless.

And even if it were not by definition worthless and not money, these banks have access to the printing presses. They can just print more.

So.... it's not a matter of the banks needing what's in your bank accounts, it's a matter of erasing the evidence of their debt to you.

Likewise, they don't tax your income or anything else in order to steal back money or credit from you; they use the taxes as a means to take fiat currency out of circulation and reduce the evidence of their own debt. This somewhat controls inflation.

Okay, so Bank Notes aren't money and these particular Notes aren't even negotiable instruments.

All the taxes you pay don't pay bills for the government.

When the Grace Commission came out and told Ronnie Reagan that not a penny of federal taxes went to pay for government services, we hardly needed a Blue Ribbon Commission to tell us that.

Actual services and a lot of other services that we never contracted to receive were all paid for in gold and silver, just as the Constitutions require.

That gold and silver was extracted under color of law from each and every one of us and our grandparents and parents, too, in "exchange" for paper I.O.U.s.

Both of the District of Columbia Municipal Corporations engaged in this undisclosed crime spree against their Employers.
